

STATE REVIEW LEARNINGS:

ARKANSAS TECH UNIVERSITY

ALTERNATIVE ROUTE

On-Site Review: September 25-26, 2024

WHAT'S IN THIS REPORT?

The report uses evidence from state data collection and an onsite review to examine educator preparation program performance. The information in this report is meant to inform a continuous improvement process that takes educator preparation programs closer to the goals needed to serve Arkansas's students.

This report rates the EPP on all three Standards of the Arkansas Education Preparation Provider State Review Framework, which are fundamental to support teacher candidates in their journey to becoming successful teachers who meet the needs of students in Arkansas:

- Standard 1, "Candidate Recruitment and Completion," is rated primarily with quantitative data from state data collection.
- For Standard 2, "Preparing Candidates Effectively," criteria to assess performance results from document review, observations, and focus group conversations with stakeholders, including teacher preparation program deans, candidates, current school leaders and teachers, faculty, and the DESE staff.
- The ratings for Standard 3, "Supporting Workforce Needs," are based on state data reporting.

Performance Levels are defined as follows:

Performance Level	Average Score Equivalent
EXCEEDS	Average score equivalent to exceeds on two of three standards or indicators
MEETS	Average score equivalent to meets on all three standards or indicators
APPROACHING	Average score equivalent to approaching on one standard or indicator and meets on the other two
BELOW	Average score equivalent to below on one standard or indicator and approaching on the other two

ARKANSAS TECH UNIVERSITY

ALTERNATIVE ROUTE

Overall Performance Level		
APPROACHING		
Performance Levels by Standard		
Standard 1: Recruitment & Completion	Standard 2: Preparing Candidates Effectively	Standard 3: Supporting Workforce Needs
APPROACHING	APPROACHING	EXCEEDS

STANDARD 1: RECRUITMENT & COMPLETION

Standard 1 Performance Level		
APPROACHING		
Indicator Performance Levels		
Indicator 1.1 Plans	Indicator 1.2 Recruitment	Indicator 1.3 Completion
MEETS	APPROACHING	BELOW
Recommendations		
Arkansas Tech University's alternative route program candidates have high rates of candidates in high-need certification areas in proportion to the need. Recruiting additional candidates to the MAT program and effectively supporting those candidates to complete the program will support the program's Standard 1 performance moving forward. <i>(Focus Area: Criteria 1.2 a and 1.3a)</i>		

INDICATOR 1.1: PLANS

Criteria 1.1a: Programs have formal plans to meet the targets described in the state review framework (I.e., Standards 1-3) and show evidence of acting on their plans	
Performance Level	Explanation
MEETS	The Arkansas Tech Alternative Program's Annual Plan presents the institution's willingness to trend toward flexibility in meeting the Arkansas teacher workforce needs, particularly with their "grow your own" model in hard-to-staff regions and their move toward flexible scheduling (hybrid, hyflex, etc.) for alternative candidates.

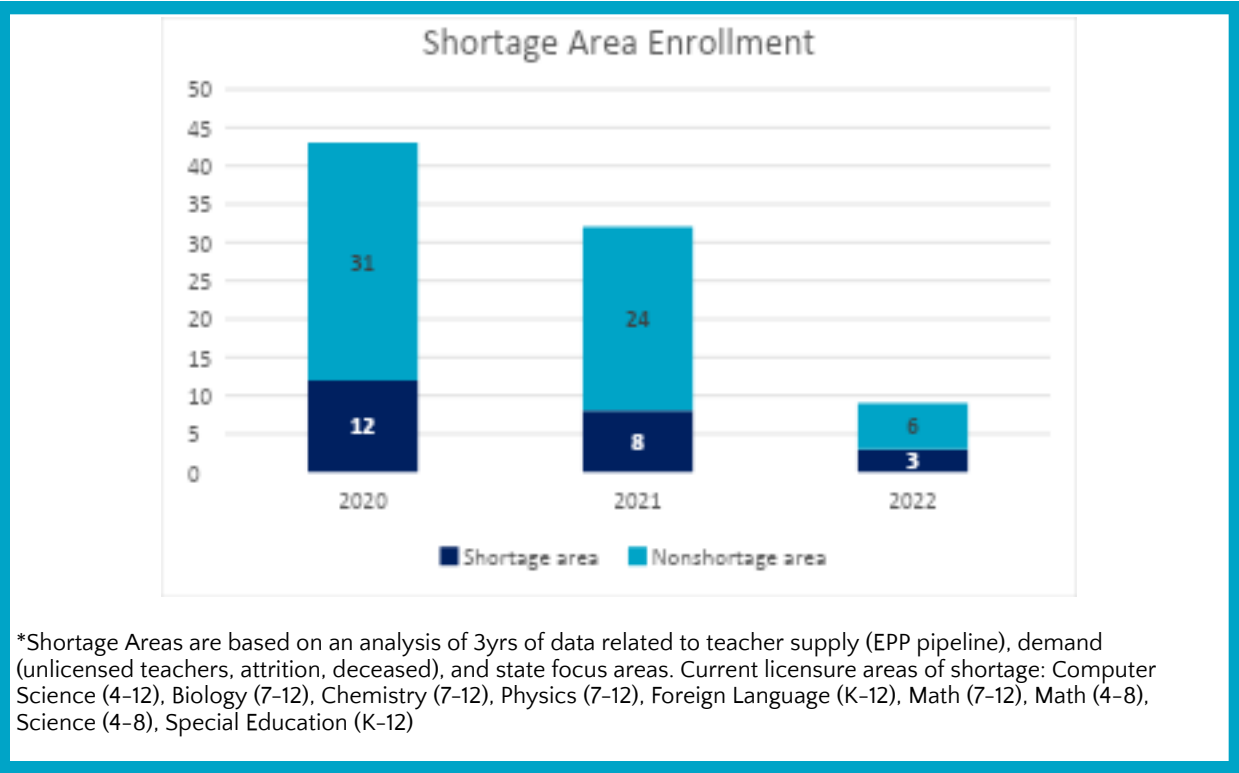

INDICATOR 1.2: RECRUITMENT

Criteria 1.2a: Programs meet annual recruitment targets that align with their program size and Arkansas's workforce needs			
Metric	Target	EPP's Percentage Growth in 3yr Average Enrollment	Performance Level
Percentage growth in 3yr average enrollment	10%	-18.4%	BELOW

Year	Percentage Growth
2017	45
2018	44
2019	12
2020	45
2021	32
2022	9

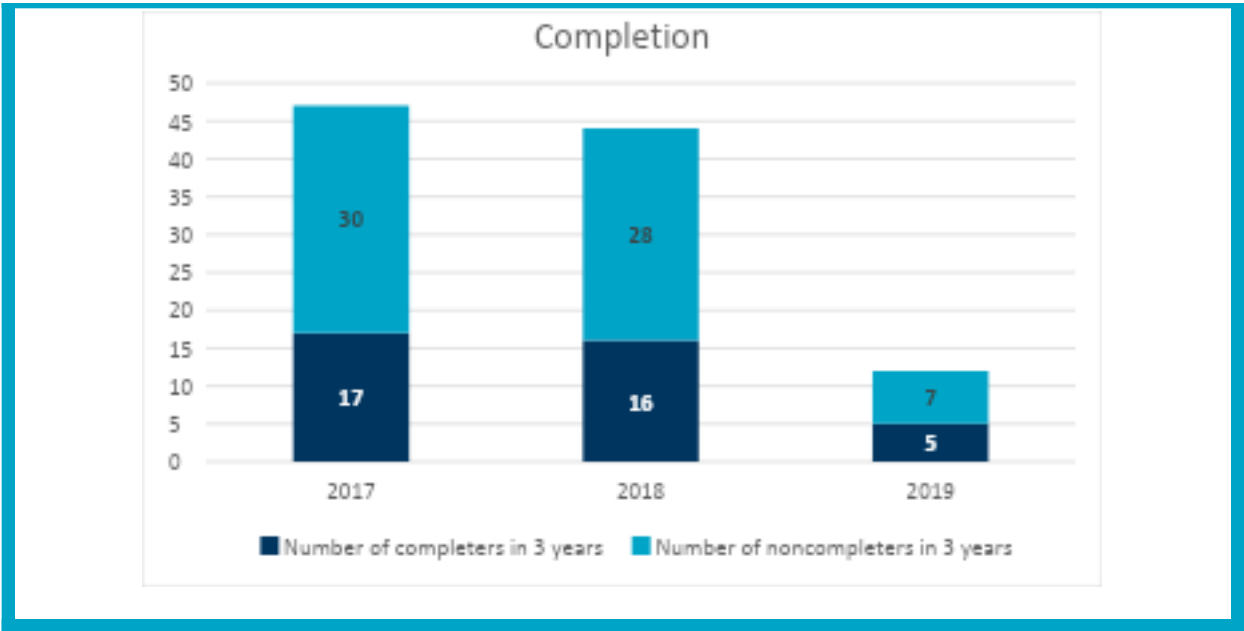

*The enrollment growth target was established with the aim of closing the sizeable gap between EPP completers and those leaving the classroom over the next 10yrs. EPPs can earn a “Meets” rating by demonstrating positive program enrollment growth (i.e., growth greater than zero) and an “Exceeds” rating by demonstrating growth greater than 10 percent.

Criteria 1.2b: Programs recruit candidates for Arkansas certification shortage areas in proportion to the need			
Metric	Target	EPP's Percent of New Enrollees in Shortage Areas	Performance Level
Percentage of program candidates recruited in shortage areas	24%	27%	EXCEEDS

INDICATOR 1.3: COMPLETION

Criteria 1.3a: Candidates have high rates of completion			
Metric	Target	EPP's 3-Year Completion Rate	Performance Level
Three-year average completion rate	74%	37%	BELOW

Standard 2: PREPARING CANDIDATES EFFECTIVELY

Standard 2 Performance Level		
APPROACHING		
Indicator Performance Levels		
Indicator 2.1 Coursework	Indicator 2.2 Clinical Experiences	Indicator 2.3 Development
APPROACHING	APPROACHING	APPROACHING
Recommendations		
The alternative route (MAT) program at Arkansas Tech University provided evidence to highlight the support and development they provide to candidates. The full EPP has strong systems and structures in place for clinical experiences that benefit both traditional and MAT candidates alike. ATU offers a wide variety of clinical experiences thanks to its large number of district partnerships. Candidates receive regular feedback and support that prepares them to be effective in the classroom. Recommendations to strengthen candidate preparation include: - Ensuring that MAT candidates are provided with high-quality coursework that prepares them with the knowledge, systems, and structures they need to teach in Arkansas schools, including grounding in HQIM and state teaching and K-12 academic standards. - By 2026-2027, EPPs will need to provide evidence that experienced mentor teachers working with year-long residents have received DESE-recognized coaching training. ATU should make sure that its training program meets this bar, and that experienced mentor teachers receive ongoing professional development. (<i>Focus Areas: Criteria 2.2b Metric 1 and Metric 4</i>) - Candidates would be better supported in their clinical internships with assigned clinical supervisors who have been thoughtfully trained to observe and provide more frequent high-quality feedback on teaching practice. (<i>Focus Areas: Criteria 2.2c Metric 2 and Criteria 2.3b Metric 4</i>)		

INDICATOR 2.1: COURSEWORK

Criteria 2.1a: Candidates receive high-quality program coursework that is evidence-based
APPROACHING
Metric 1: Incorporation and demonstration of best practices around content instruction APPROACHING Coursework incorporates some nationally recognized best practices around content instruction. Syllabi show some reference to best practices and Science of Reading; however, it is a standardized list identical across syllabi and does not show actual integration and utilization for candidates. Further most of the coursework does not explicitly reference the use of HQIM, nor how to recognize and incorporate HQIM into unit planning. In the Course Instructor

focus group, participants did not share any examples of how HQIM is being used. Reviewers were not able to collect evidence toward this metric in the MAT Coursework observation.

Metric 2: Incorporation and utilization of Arkansas K12 Standards in coursework as a foundation for teacher development

APPROACHING

Coursework somewhat familiarizes candidates with Arkansas K-12 Academic Standards and provides some opportunities to integrate standards throughout all grade bands within the licensure area. Documentation submitted by ATU shows that most of the coursework references appropriate incorporation of Arkansas K-12 Standards; however, few courses provide students the opportunity to vertically integrate standards. Integration was seen in the course Basic Elements of Curriculum (MTLL 6133).

However, vertical alignment of K-12 standards was not observed by on-site Reviewers in the Advanced Curriculum Theory and Design (MTLL 6253). In the Coursework focus group, even when prompted by the reviewer, participants could not provide examples or confirm they have opportunities to vertically integrate standards in their courses.

Criteria 2.1b: Candidates' coursework supports their development as a teacher

MEETS

Metric 1: Sequence and progression of courses

MEETS

Courses are clearly and intentionally sequenced across programs of study to build off previous coursework. The "Degree Plan" and "Program of Study" documentation shows courses increase in rigor, and there are checkpoints for reinforcement opportunities for teacher candidates. The "MAT Course Scope and Sequence" shows intentionality of concept within the full curriculum. In the Course Instructor focus group, one instructor said, "There is a developmental continuum. Those initial courses are foundational. They move into the advanced curriculum," which is seen the scope and sequence documentation. Reviewers were not able to collect additional evidence toward this metric in the MAT Coursework observation or candidate Coursework Focus Group.

Metric 2: Incorporation and utilization of Arkansas Educator Competencies and Arkansas Teaching Standards in coursework

MEETS

Coursework clearly and intentionally incorporates Arkansas Teaching Standards in a way that develops candidates to meet the knowledge and skills of their required licensure area. In the Course Instructor focus group, one participant shared, "all of the courses are aligned with Arkansas Teaching Standards and Aspiring Teacher Rubric – all of the courses and what guides their education." Most course syllabi include a crosswalk of the course objectives to the Aspiring Teacher Rubric and Arkansas Teaching Standards. Reviewers were not able to collect additional evidence toward this metric in the MAT Coursework observation or by MAT candidates in the Coursework Focus Group.

Metric 3: Alignment of coursework to clinical experience

MEETS

Documentation submitted as evidence suggests that the coursework is clearly and intentionally aligned to clinical experiences, and that candidates have opportunities to reflect on the alignment with their course instructor and clinical supervisor. In the "MAT Course Flow, Topics and Major Assignments" document, ATU outlines the requirements for MAT students. In seven of ten courses, not including the final internship semester, ATU teacher candidates are expected to complete a clinical experience as part of their coursework. This could include teacher interviews, attending a Board meeting or completing an action research project. Course syllabi further show intentional alignment between clinical experiences and coursework.

In the Course Instructor focus group, participants shared "teacher candidates are always going back to their clinical experience" and they are "reflecting all the time," although reviewers were not able to observe any reflection happening in the coursework observation or MAT candidates discussing the alignment with their clinical experience in the coursework focus group.

Criteria 2.1c: Candidates are provided with knowledgeable and effective course instructors

APPROACHING

Metric 1: Quality of course instructors APPROACHING

Some course instructors have deep knowledge of Arkansas K-12 Standards, content knowledge and content pedagogy. While all course instructors have a terminal degree aligned to educator preparation, fewer than half of the instructors have been trained in the TESS rubric, and recent professional learning experience is not specific for most instructors. In one of the coursework observations, reviewers noted "There were no mentions of Arkansas K-12 Standards or TESS. There were some missed opportunities to make these connections. They only talked about norms and the importance of those in a K-12 classroom for the first week of school."

Metric 2: Effectiveness of course instructors APPROACHING

Most course instructors have a proven history and show evidence of strong facilitation of coursework and providing feedback and support. ATU asks for teacher candidates to complete a survey each semester and at least 80% of respondents rated their course instructor positively. For example, 89% of respondents agreed or strongly agreed that their course instructor demonstrated a clear understanding of course topics and 81% rated their instructor's overall performance as very good or positive. ATU shared staff are evaluated yearly by DPEC, a tenure committee, and their department head. The evaluation includes a portfolio, reflections, where to improve, etc., however no data was shared about the effectiveness of staff or overall ratings.

However, in the course observation, reviewers noted a lack of feedback saying, "Outside of saying good job, great, and fantastic, there were missed opportunities to help students improve when they were sharing their first week plans." In the Course Instructor focus group, instructors shared different tools they use to engage with students, such as Webex and the Remind app.

INDICATOR 2.2: CLINICAL EXPERIENCES

Criteria 2.2a: Candidates are provided clinical experiences throughout their program that support their development as a teacher APPROACHING

Metric 1: The sequence of clinical experiences APPROACHING

The overall sequence of clinical experiences clearly and intentionally builds off previous experiences and includes opportunities for learning and development. Most teacher candidates in the MAT program already work as the teacher of record in a classroom. If a teacher candidate is not currently working in a school, they are placed in a semester long internship experience during their MTLL6553 course. In addition to their internship experiences, in each semester MAT teacher candidates are required to complete additional classroom experiences to give them a sequence of clinical experience. For example, in their summer semester before they start teaching, teacher candidates are required to attend a School Board meeting and interview school leaders at the district, school, and classroom levels. In the fall semester in the Instructional Leadership (MTLL 6123) course, teacher candidates conduct three teacher interviews and a reflection, and video teach. In the spring semester in the Teaching Reading in the Content Area (MAMS 5333) course, teacher candidates evaluate three classrooms for literacy rich learning environments. Similar experiences are expected in their second year of the program.

Reviewers were not able to collect additional evidence toward this metric any observations or focus groups.

Metric 2: The variety of clinical experiences MEETS

The overall variety of clinical experiences provides adequate opportunities for candidates to work with students with varied learning needs. Teacher candidates are either already working in a school, or placed in one of ATU's partner schools, which naturally exposes them to a variety of students with varied needs. In addition, as mentioned above, as

part of their coursework, teacher candidates are expected to conduct teacher interviews, attend a board meeting, and video teacher, exposing them to a variety of classroom experiences and student learning environments.

Reviewers were not able to collect additional evidence toward this metric in any observations or focus groups.

Criteria 2.2b: Candidates across the program are provided with an effective clinical internship
APPROACHING

Metric 1: The effectiveness of experienced mentor teachers
MEETS

100% of principals in the EPP Partnership focus group shared that all teacher candidates have a campus-based supervisor OR an EPP supervisor and mentor teacher, and the placement process is the same for traditional and MAT students.

Based upon the evidence provided by the joint Traditional/MAT partnership focus group, the same rules and processes apply for both programs; most experienced mentor teachers are equipped and demonstrate that they have the coaching skills to properly support and develop a MAT candidate's pedagogical development. In the survey results spreadsheet, "Results Spring 2024," eight questions related to experienced mentor teachers including actionable feedback, effective assessment, holding in person or virtual meetings, and the average was 4.7 out of 5, the most positive – although the results are not differentiated by traditional or MAT respondents. In the "Intern Exit Survey," teacher candidates responded positively (4.7 out of 5) that "the mentor teacher with whom I was placed, modeled good teaching practices in line with four TESS domains" and "the mentor teacher benefited my growth and development as a future educator." Nearly all respondents who left comments on their mentor teacher were positive – although the results are not differentiated by traditional or MAT respondents.

Mentor teachers are either a Cohort Mentor Teacher, meaning they have completed ATU's Cohort Teacher Training and are responsible for being the mentor teacher AND conducting formal observations or they work as a Campus Based Supervisor, meaning they have not completed ATU's training and will work with an ATU Clinical Supervisor. The ATU Clinical Supervisor will come onsite for the formal evaluations, but the Campus Based Supervisor (mentor teacher) will serve as the day-to-day mentor teacher.

Note: By 2026-2027, experienced mentor teachers working with year-long residents must have received the DESE-recognized coaching training. [Arkansas Novice Teacher Mentoring Manual](#)

Metric 2: Quality of selection process for experienced mentor teachers
MEETS

A clear and intentional process is in place to select experienced mentor teachers to work with both traditional and MAT candidates. The ATU TESS office coordinates placement with a school or district and the building principal identifies an experienced mentor teacher. During the EPP Partnership focus group, principals shared a set of criteria they use to select their mentor teachers including evaluation ratings, years of experience and value-added scores. Those selected as experienced mentor teachers by their principal are invited to complete ATU's Cohort Teacher Training.

Mentor teachers who successfully complete ATU's Cohort Teacher Training can then be selected as a Cohort Mentor Teacher to both mentor AND conduct formal observations.

Metric 3: Quality of clinical supervisors
APPROACHING

Some clinical supervisors show evidence of and have a history of effective instructional practices and coaching with a positive impact. There are fourteen clinical supervisors from ATU; however, because of ATU's Cohort Model, where mentor teachers are trained to conduct the formal evaluation, it is unclear how many clinical supervisors support MAT teacher candidates, and the review team could not determine this information while onsite.

Reviewers noted in the MAT coursework observation that the clinical supervisor demonstrated effective coaching skills by suggesting the teacher candidates use the JICSAW method and shared additional resources with the teacher candidate to better support them.

Metric 4: Quality of feedback to candidates

APPROACHING

Candidates sometimes receive high-quality feedback. There is evidence of structures set up to solicit regular feedback and coaching for each MAT teacher candidate, and evidence they receive written and oral feedback. The Program Directors shared ATU follows the POP cycle including a pre-observation, observation, and post observation feedback cycle. Teacher candidates are evaluated formally four times per year and informally more frequently by their mentor teacher.

During observations, reviewers noted, “the clinical program supervisor showed evidence of oral feedback and stated written feedback would be sent. Although the supervisor did not specifically mention Aspiring TESS Rubric, the feedback did fall within the domains. Feedback provided goals to work on for future lessons.” In a different coaching observation, the review team noted, “There were little opportunities to reflect on feedback. There was no link to the Aspiring Teacher Rubric.” Finally, in one example from the portfolio, reviewers observed the feedback is linked to the TESS domains, but the clinical supervisor gave the teacher candidates all “effective” ratings and did not provide any suggestions for improvement to continue to grow their skills.”

Note: The Aspiring Teacher Rubric must be in use by EPPs by the 2024-25 academic year.

Criteria 2.2c: Strong partnerships exist between the EPP and K12 schools and districts that facilitate the development of strong candidates

APPROACHING

Metric 1: Quality of partnership with districts/schools

APPROACHING

Collaborative processes are in place with most districts to co-construct the clinical internship for candidates. In the EPP Partnership focus group, all principals expressed satisfaction with their partnership with ATU.

While there are not any formal communication structures in place, they communicate frequently via phone, text, and email. They also noted that if there is an issue with a teacher candidate, ATU is very responsive, often resolving the issue within 24-48 hours.

Metric 2: Support and development for clinical supervisors

APPROACHING

There are some collaborative processes that support and develop effective clinical supervisors serving both traditional and MAT students. ATU includes cohort mentor teachers and campus-based supervisors in their definition of clinical supervisors. Cohort mentor teachers are required to complete training over the summer that includes information about their role, the feedback cycle and the Aspiring Teacher Rubric. Cohort mentor teachers are paid by ATU while they serve in this role. There are other clinical supervisors who are faculty or adjunct at ATU who also receive training in their role. There was no evidence provided of ongoing professional development for clinical supervisors and in Clinical Supervisor focus groups, participants in the cohort mentor teacher role felt that communication is one way. Although they feel they can always reach out to the EPP with questions, there are no ongoing check ins, meetings, or development that the EPP initiates. The TESS Office maintains the evaluations and survey results for clinical supervisors; however, reviewers did not see results or the process if clinical supervisors did not have strong reviews.

INDICATOR 2.3: DEVELOPMENT

Criteria 2.3a: Candidates are successful with their program coursework

MEETS

Metric 1: Candidate proficiency in coursework

MEETS

Most candidates show proficiency in coursework requirements. Teacher candidates in the alternative route/MAT program have high GPAs at admission, and upon program completion, they have increased their GPA. For example, in Spring 2024 the average GPA was 3.64 at admission and 3.72 at completion.

Metric 2: Quality of candidate support across coursework

APPROACHING

Candidates are inconsistently provided with an individualized support plan if their coursework requirements are not on track. All students complete a Professional Growth Plan (PGP) upon entrance into the program. If candidates fall off track, they are put on an intensive growth plan. In the PGP example submitted by ATU, a teacher candidate had not passed their Praxis exam. The plan noted when resources were emailed to the teacher candidate, but there was no evidence of it being a collaborative plan or that additional support was provided other than sending resources.

Criteria 2.3b: Candidates are successful in their clinical internship

APPROACHING

Metric 1: Candidate attainment of clinical internship goals and milestones

APPROACHING

Programs have a set of goals and milestones, and some candidates meet these goals. In the documentation submitted by ATU, there is a "MAT Course Objectives Matrix" document that outlines the requirements for each course and the internship.

However, in focus groups with mentor teachers, program participants and course instructors, no one could tell reviewers what the program goals and milestones are. That said, the Aspiring Teacher Rubric evaluation data and GPA data indicate that teacher candidates meet these goals.

Metric 2: Candidate impact on student growth

MEETS

There is adequate evidence that candidates have the capacity to impact student growth. Throughout the internship experience, teacher candidates complete reflections and are asked to consider student learning needs. Teacher candidates also complete an exit portfolio where they are asked to reflect upon their full internship experience and their impact on student learning. In the exit portfolio, teacher candidates take what was learned previously and apply it fully to a classroom in the public-school setting and reflect upon their impact on student learning by providing assessment results, discussing these assessment results, and considering student learning needs within the learning environment.

Metric 3: Candidate proficiency in effective teaching skills

MEETS

Most candidates receive a score of "effective" on the Aspiring Teacher Rubric at the end of their clinical internship. Over four evaluations, all cohorts showed growth and the percentage of teacher candidates earning an effective rating increased. 64% of students in Spring 2024 cohort earned an effective rating during their first evaluation, 64% earned an effective rating and 29% earned a highly effective rating in their last evaluation. ATU transitioned to using the Aspiring Teacher Rubric Fall 2023.

Note: By 2024–25, evidence that the Aspiring Teacher Rubric is in use by EPPs must be shown to meet this metric.

Metric 4: Quality of candidate support across clinical internship

APPROACHING

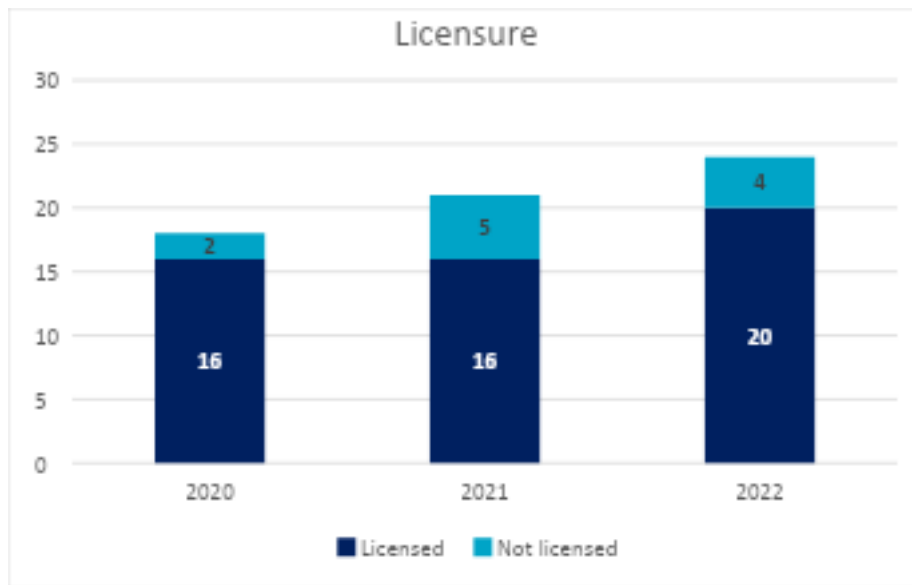

Struggling candidates are sometimes provided with an individualized support plan if their development is not on track, but few or no high performing candidates receive opportunities and feedback that encourage retention. There were two support plans provided to the review team; however, they were not specific to the clinical internship. During the EPP Partnership focus group, all principals shared that if there is a teacher candidate who is struggling, ATU is quick to address the issue. One principal said there has only been one situation that was not resolved and, overall, ATU is very good about supporting their teacher candidates; however, reviewers did not see any specific evidence to highlight what the support plans look like in action.

STANDARD 3: SUPPORTING WORKFORCE NEEDS

Standard 3 Performance Level		
EXCEEDS		
Indicator Performance Levels		
Indicator 3.1 Licensure	Indicator 3.2 Employment	Indicator 3.3 Effectiveness
EXCEEDS	EXCEEDS	EXCEEDS
Recommendations		
Arkansas Tech University's alternative route program Meets or Exceeds every metric in Standard 3, Supporting Workforce Needs. Recommendations include: Analyze EPP Completer Supervisor Survey and EPP Completer Survey results to identify specific domains and components for which both supervisors and candidates their program could prepare them even better to become a teacher. (Focus Areas: Criteria 3.3a and 3.3b)		

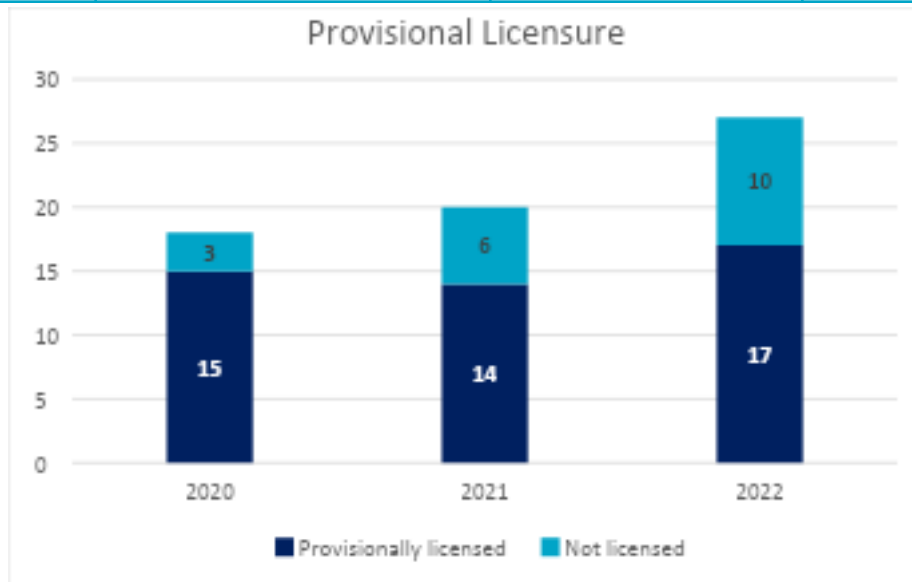

INDICATOR 3.1: LICENSURE

Criteria 3.1a: A high proportion of program candidates obtain a standard license			
Metric	Target	EPP's Percentage Licensed	Performance Level
Percentage of completers who have earned a standard license within one year of completion	76%	83%	EXCEEDS

Criteria 3.1b: A high proportion of alternative route enrollees are provisionally licensed

Metric	Target	EPP's Percentage Licensed	Performance Level
Percentage of employed alternative route enrollees who are provisionally licensed	69%	70.8%	EXCEEDS

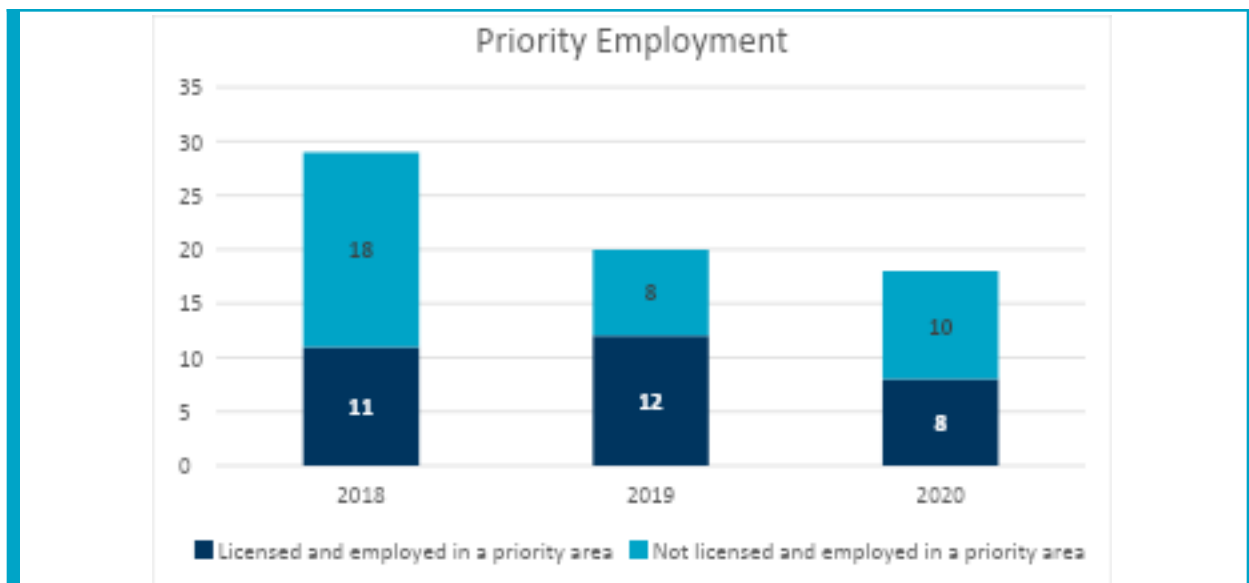

Criteria 3.1c: A high proportion of traditional program candidates pass the content exam in their area on the first try

Metric	Target	EPP's First-Time Pass Percentage	Performance Level
Percentage of first-time licensure exam test takers that pass on their first try	65%	n/a	n/a

INDICATOR 3.2: EMPLOYMENT

Criteria 3.2a: A high proportion of completers are employed in Arkansas public schools															
Metric	Target	EPP's Percentage Employed	Performance Level												
Percentage of completers who are licensed and gain employment in Arkansas public schools in their first three years after completion	64%	82.1%	EXCEEDS												
Employment <table><thead><tr><th>Year</th><th>Licensed and employed</th><th>Not licensed and employed</th></tr></thead><tbody><tr><td>2018</td><td>26</td><td>3</td></tr><tr><td>2019</td><td>15</td><td>5</td></tr><tr><td>2020</td><td>14</td><td>4</td></tr></tbody></table>				Year	Licensed and employed	Not licensed and employed	2018	26	3	2019	15	5	2020	14	4
Year	Licensed and employed	Not licensed and employed													
2018	26	3													
2019	15	5													
2020	14	4													
Criteria 3.2b: A high proportion of completers work in high-priority Arkansas public school districts and subjects															
Metric	Target	EPP's Percentage Employed Priority	Performance Level												
Percentage of completers who are licensed and gain employment in high-priority Arkansas public school districts and subjects in their first three years after completion	40%	46.3%	EXCEEDS												

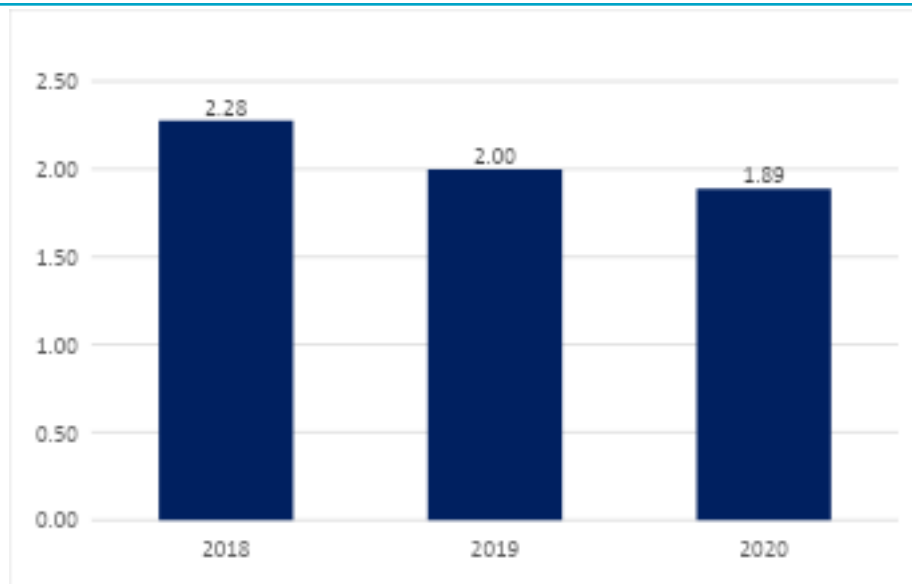

*Priority Employment is employment in a high-need subject area and/or geographical shortage area. Shortage Areas are based on an analysis of 3yrs of data related to teacher supply (EPP pipeline) and demand (unlicensed teachers, attrition, deceased) and state focus areas.

Current subject shortage areas for employment: Computer Science, Secondary Science, Foreign Language, Secondary Math, Middle School Math, Middle School Science, and Special Education.

Current geographical shortage areas are school districts located in the following co-op regions: Arkansas River ESC, Great Rivers ESC, Pulaski Co Schools, Southeast AR ESC.

Criteria 3.2c: Program completers remain in the classroom for multiple years			
Metric	Target	EPP's Average Years of Experience, 3 Years After Completion	Performance Level
Program completers' average licensed teaching experience in Arkansas's public schools 3 years after completion	1.7	2.09	EXCEEDS

INDICATOR 3.3: EFFECTIVENESS

Criteria 3.3a: School leaders rate program completers that they hire as effective classroom teachers			
Metric	Target	EPP's Average Percentage of Agree+ on all Survey Items	Performance Level
School leaders' perception of program completer effectiveness based on responses to the EPP Completer Supervisor Survey conducted annually by the DESE	81%	90.9%	EXCEEDS
Criteria 3.3b: Completers feel that their program prepared them well to be a teacher			
Metric	Target	EPP's Average Percentage of Agree+ on all Survey Items	Performance Level
Program completers' perception of how well their program prepared them to be a teacher based on responses to the EPP Completer Survey conducted annually by the DESE	75%	83.3%	EXCEEDS
Criteria 3.3c: A high proportion of program completers have above-average value-added scores			
Metric	Target	EPP's Percentage with Average Value-Added of 80+	Performance Level
Percentage of program completers who have above-average value-added scores in their first three years after completion	43%	38%	MEETS
