

# STATE REVIEW LEARNINGS:

## CENTRAL BAPTIST COLLEGE

### TRADITIONAL

On-Site Review: February 5–6, 2025

#### WHAT'S IN THIS REPORT?

The report uses evidence from state data collection and an onsite review to examine educator preparation program performance. The information in this report is meant to inform a continuous improvement process that takes educator preparation programs closer to the goals needed to serve Arkansas's students.

This report rates the EPP on all three Standards of the Arkansas Education Preparation Provider State Review Framework, which are fundamental to support teacher candidates in their journey to becoming successful teachers who meet the needs of students in Arkansas:

- Standard 1, "Candidate Recruitment and Completion," is rated primarily with quantitative data from state data collection.
- For Standard 2, "Preparing Candidates Effectively," criteria to assess performance results from document review, observations, and focus group conversations with stakeholders, including teacher preparation program deans, candidates, current school leaders and teachers, faculty, and the DESE staff.
- The ratings for Standard 3, "Supporting Workforce Needs," are based on state data reporting.

Performance Levels are defined as follows:

| Performance Level | Average Score Equivalent                                                                        |
|-------------------|-------------------------------------------------------------------------------------------------|
| EXCEEDS           | Average score equivalent to exceeds on two of three standards or indicators                     |
| MEETS             | Average score equivalent to meets on all three standards or indicators                          |
| APPROACHING       | Average score equivalent to approaching on one standard or indicator and meets on the other two |
| BELOW             | Average score equivalent to below on one standard or indicator and approaching on the other two |

| *The enrollment growth target was established with the aim of closing the sizeable gap between EPP completers and those leaving the classroom over the next 10yrs. EPPs can earn a “Meets” rating by demonstrating positive program enrollment growth (i.e., growth greater than zero) and an “Exceeds” rating by demonstrating growth greater than 10 percent.                                                                                  |                   |                                                   |                   |      |                   |      |    |      |    |      |    |      |    |      |   |      |    |
| Criteria 1.2b: Programs recruit candidates for Arkansas certification shortage areas in proportion to the need                                                                                                                                                                                                                                                                                                                                   |                   |                                                   |                   |      |                   |      |    |      |    |      |    |      |    |      |   |      |    |

| Indicator 2.1<br>Coursework                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Indicator 2.2<br>Clinical Experiences | Indicator 2.3<br>Development |
| APPROACHING                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | APPROACHING                           | MEETS                        |
| Recommendations                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                       |                              |
| <p>Central Baptist College provided evidence to highlight its commitment to developing candidates to prepare them with the knowledge, systems and structures they need to teach in Arkansas schools by aligning coursework with clinical experiences and providing a variety of field experiences. Candidates have clear goals and milestones to help them successfully complete the program and have the capacity to positively impact student growth.</p> <p>Recommendations to strengthen candidate preparation include:</p> <ul style="list-style-type: none"> <li>• Audit coursework for classroom connections, ensuring instructors provide models of instruction, incorporate high-quality instructional materials, clearly and intentionally familiarize candidates with Arkansas K-12 Standards, and reflect with course instructors on alignment between Educator Competencies, Arkansas Teaching Standards and coursework. (<i>Focus Areas: Criteria 2.1a Metrics 1 and 2, Criteria 2.1b Metric 2</i>)</li> <li>• By 2026-2027, EPPs will need to provide evidence that experienced mentor teachers working with year-long residents have received DESE-recognized coaching training. CBC should make sure that its training program meets this bar, and that clinical supervisors as well as experienced mentor teachers receive ongoing professional development. (<i>Focus Areas: Criteria 2.2b Metrics 1, 3, and 4</i>)</li> <li>• CBC should continue planning to meet the state's one-year residency requirement, which will apply to spring 2027 completers and beyond.</li> </ul> |                                       |                              |

## INDICATOR 2.1: COURSEWORK

| Criteria 2.1a: Candidates receive high-quality program coursework that is evidence-based                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| APPROACHING                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <p>Metric 1: Incorporation and demonstration of best practices around content instruction</p> <p>APPROACHING</p> <p>Coursework incorporates some nationally recognized best practices around content instruction. The syllabus for Integrated Sciences for Teachers (SCI 4300) includes a review of HQIM for science standards, and the syllabus for Special Methods in ML Content (EDU 4370) includes a review of HQIM AR competencies and directly references recognizing and utilizing HQIM.</p> <p>In the Course Instructor focus group, participants said that they use HQIM in the class by looking at materials for evidence-based practices and align those practices with the standards. However, reviewers did not see evidence of</p> |

incorporation of HQIM in any of the three course observations, outside of a brief introduction and reference to the DESE website. The EPP fulfills the Science of Reading requirements with AR Ideas. However, in the Coursework focus group, no candidates were familiar with Arkansas Ideas, and only one candidate had taken a literacy intervention course.

**Metric 2: Incorporation and utilization of Arkansas K12 Standards in coursework as a foundation for teacher development**  
**APPROACHING**

Coursework somewhat familiarizes candidates with Arkansas K-12 Standards throughout all grade bands within the licensure area. For example, in two of the syllabi, Integrated Science for Teachers (SCI 4300) and Special Methods in ML Content (EDU 4370), courses reference reviewing and unpacking Arkansas Academic Standards. Teaching Elementary Stem (EDU 4320) includes both Common Core standards for Math and Arkansas standards for science. There is a lack of consistency in the use of K-12 standards, as some courses reference Common Core State Standards.

In the Coursework focus group, all candidates agreed they are familiar with the K-12 standards. They gave examples of working with standards, analyzing them, and doing micro-teaches based on standards. Participants were not able to give examples of working across grade levels or vertical alignment of standards.

In the Special Methods in ML Content (EDU 4370) course observation, reviewers observed teacher candidates working with Arkansas K-12 Academic Standards. In the course, all teacher candidates identified and utilized standards to determine fit and appropriateness of board games in a social studies course. 100% of students accessed and used AR K12 standards during the review of board games. The students discussed and justified the chosen standard's connection to Economics and Civics.

Although reviewers saw many examples of working with AR Academic State Standards, they did not observe evidence of intentionally providing candidates opportunities to vertically integrate standards throughout all grade bands within the licensure area.

**Criteria 2.1b: Candidates' coursework supports their development as a teacher**  
**APPROACHING**

**Metric 1: Sequence and progression of courses**  
**MEETS**

Courses are clearly and intentionally sequenced and increase in rigor throughout the programs of study. Courses and programs of study design include checkpoints for reinforcement opportunities for candidates. The eight semester plans for all pathways show clear intention around course sequencing and an increase in rigor. Clinical experience handbooks outline increased responsibility for student learning. For example, the third-year clinical experience handbook requires partial lesson instruction and reflection, the fourth year requires full lesson plus student work samples, and the clinical internship handbook requires a full portfolio of artifacts. In the Coursework focus group, all three candidates felt their courses are sequenced and show an increase in rigor.

**Metric 2: Incorporation and utilization of Arkansas Educator Competencies and Arkansas Teaching Standards in coursework**  
**APPROACHING**

Documentation evidence shows that coursework incorporates Arkansas Educator Competencies and Arkansas in course syllabi. The course syllabus template includes reference to Arkansas Teaching Standards and Educator Competencies and reviewers noted intentional alignment between course objectives and Arkansas Teaching Standards and AR Educator Competencies in syllabi.

Although Arkansas Educator Competencies and Arkansas Teaching Standards are outlined in course syllabi, the review team did not observe an explicit connection in the classwork within lessons in any of the four courses they observed. In the Course Instructor focus group, one of the four participants spoke about how they use competencies in their coursework.

**Metric 3: Alignment of coursework to clinical experience**  
**MEETS**

The coursework design is clearly and intentionally aligned to clinical experience and almost all courses have required fieldwork or observation hours. Candidates consistently have opportunities to reflect on and articulate alignment with their clinical supervisor and course instructors. Candidates must submit a formal reflection within 48 hours of the lessons they teach during the clinical experience for both third- and fourth-year clinical experiences.

In the Coursework focus group, all three participants shared specific examples of how their coursework is aligned with their clinical experiences. One candidate connected a student's behavior in class with an educational theorist and philosophy. Another candidate discussed bringing back scenarios from the classroom to discuss in her course. She talked specifically about examples having to do with IEPs.

In the course observation, Teaching Sec. Health & PE (KIN3301), the course instructor incorporated alignment of stated objectives to previous clinical experience and foreshadowed its application in a future micro-teach and new clinical experience. Writing an evidence-based educational objective, and aligning practice to Bloom's taxonomy, provided candidates opportunities to reflect on clinical experiences where lesson plans were previously written. Candidates were afforded multiple opportunities for application, both individually and collaboratively.

**Criteria 2.1c: Candidates are provided with knowledgeable and effective course instructors**  
**APPROACHING**

**Metric 1: Quality of course instructors**  
**MEETS**

Most course instructors show deep knowledge of Arkansas K-12 Academic Standards, content knowledge, and content pedagogy. Most course instructors have a terminal degree and hold an educator or administrator license. Most instructors have been trained in the aspiring teacher rubric, and specific, recent professional learning is documented for all instructors.

In the Course Instructor focus group, candidates shared specific examples of how they continue to develop knowledge and skills. They provided examples such as completing RISE Training, completing Arkansas IDEAS, going to offered trainings and professional development.

In the Teaching Sec. Health & PE (KIN 3301) course observation, reviewers noted that the course instructor provided a deep knowledge of content and pedagogy. The instructor introduced the lesson with a preassessment of Bloom's taxonomy and its correlation to DOK by having students collaborate towards aligning the scale of Bloom's domains correctly on a wall with individual identifiers placed on different slips of paper. The course instructor previewed the domains while teaching, showcasing the application of each skill to students, who were then asked to provide evidence of their understanding of the concepts.

**Metric 2: Effectiveness of course instructors**  
**APPROACHING**

Little evidence was observed to assess the effectiveness of course instructors. There was no evidence submitted of an annual course evaluation process and no evidence of candidate evaluations of course instructors outside of two questions on a satisfaction survey ((a) extent to which instructors modeled best practices and b) extent to which instructors modeled best use of technology).

In all four observations, reviewers noted that instructors demonstrated strong facilitation skills through questioning and discussion throughout the lesson and provided feedback and support to their teaching candidates. The EPP shared peer evaluations are required by the department on a rotational basis and the educational department is up for review during the 2024-2025 school year. However, this is not a consistent evaluation process to assess course instructor effectiveness.

## INDICATOR 2.2: CLINICAL EXPERIENCES

**Criteria 2.2a: Candidates are provided clinical experiences throughout their program that support their development as a teacher**  
**MEETS**

### Metric 1: The sequence of clinical experiences

#### MEETS

The overall sequence of clinical experiences builds off previous experiences and includes opportunities for learning and development. The Clinical Experience Scope and Sequence document outlines the progression of clinical experiences for teacher candidates beginning in The Ed Profession (EDU1310) in their junior year. During this course, candidates must complete 20 hours of observations, interview a teacher and attend a school board meeting. In the Junior Block, candidates complete 40 hours of clinical experience including teaching a partial lesson to a small group and whole group and a whole lesson to a small group and whole group. They are also evaluated once by their clinical supervisor.

In the Senior Block, candidates complete 120 hours of clinical experience where they observe two teachers in their building, they teach two lessons and complete a mini sample teach.

Finally, during their internship semester, they complete 15 weeks of full classroom teaching including four formal observations, observe teachers in their building and complete classroom management and professional development plans.

### Metric 2: The variety of clinical experiences

#### MEETS

Candidates are provided multiple opportunities throughout their junior and senior years to work with students with diverse learning needs. For example, in Teaching Exceptional and Diverse Learners (EDU4340), guest speakers including Gifted and Talented, ESOL and integration specialists speak to candidates about their classrooms. In Classroom Management (EDU3360), there are units of study that focus on teaching strategies to use with students with varied learning needs or behavioral issues.

In the Clinical Supervisor focus group, participants stated candidates are assigned to a variety of school districts to complete their clinical experiences. One supervisor shared that, in addition to their experiences, candidates complete a case study that includes a reading assessment on an identified struggling student.

### Criteria 2.2b: Candidates across the program are provided with an effective clinical internship

#### APPROACHING

### Metric 1: The effectiveness of experienced mentor teachers

#### APPROACHING

Some experienced mentor teachers are able to demonstrate they have the coaching skills to support candidates. CBC supervisors and experienced mentor teachers attend a training session in the beginning of the semester that includes responsibilities of supervisors and mentor teachers as well as coaching and co-teaching. Additionally, mentor teachers are informed about the responsibilities of the intern during clinical internships regarding attendance, teaching timeline, serving as a substitute teacher, assignments, and evaluation. In the Spring 2023 Program Completer Satisfaction survey, respondents had an average rating of 3.89 out of five (78%) in the following areas: “clearly explained school and district policies,” “challenged me to think and reflect as a teacher,” and “gave me adequate feedback on my performance.”

All Clinical Experience focus group participants commended the support and coaching they received from mentor teachers in their clinical experiences to date. However, in the School Partnership focus group, participants suggested districts could benefit from a more formalized training program for mentor teachers. They suggested that developing a pathway for teachers to become mentors, alongside professional development for EPP staff would help strengthen this component of the partnership, ensuring that mentors are equipped with the skills to support interns more effectively.

No evidence was provided about mentor teachers to verify their effectiveness or qualifications.

*Note: By 2026-2027, experienced mentor teachers working with year-long residents must have received the DESE-recognized coaching training. [Arkansas Novice Teacher Mentoring Manual](#)*

### Metric 2: Quality of selection process for experienced mentor teachers

#### MEETS

The process for selecting experienced mentor teachers for clinical interns is outlined in the Memorandum of Understanding between partner schools and Central Baptist College. It states that school administrators will recommend experienced mentor teachers who are fully licensed in the content in which they teach, have a minimum of three years of teaching experience, have completed training in AR TESS, have a proficient or higher rating in their most recent overall TESS evaluation, are actively engaged in the school community, and agree to provide CBC supervisors substantive formative and summative feedback regularly.

School Partnership focus group participants highlighted that mentor teachers hold interns to the same learning standards as a teacher of record, ensuring that interns receive rigorous and effective coaching. The selection of these mentors appears to be thoughtful, with an emphasis on choosing those who can provide valuable insight and assistance, including those who have undergone specialized training programs like the NIET and Leadership Academy. Another participant mentioned the collaboration between the EPP and district ensures mentors are not only experienced but also well-matched to the intern's specific needs.

### Metric 3: Quality of clinical supervisors APPROACHING

Some clinical supervisors show evidence of effective instructional practices and coaching with a positive impact. In the "Clinical Supervisor Data" chart, there are five clinical supervisors. All supervisors have completed rubric training and four of five completed coaching training June 2024, while the last supervisor is currently working on training.

At the end of each semester, candidates provide survey feedback on their clinical supervisors and on average, candidates are satisfied with the support they receive. 89% of candidates said their clinical supervisor "served as a resource person and provided opportunities for individual assistance" and 96% agreed their supervisor gave them adequate feedback on their performance.

All three Clinical Experience focus group participants reported minimal support from a clinical supervisor during their clinical internship experiences. One participant said, "I struggled this past semester with knowing what to expect from clinicals. I felt like it was here, and it was there. I just felt overwhelmed. I am organized and responsible, but I wasn't given the tools necessary to be successful. It could have been better." Another candidate shared, "We have to hold ourselves accountable...but it feels that we were not given the appropriate information to be successful. It was told to us differently than what we experienced."

Reviewers noted mixed evidence during coaching observations, seeing both strong coaching and areas for improvement. During one coaching session, the clinical supervisor evaluated the lesson using every component of the Aspiring Teacher Rubric while allowing the teacher candidate time and space to reflect on her lesson. The supervisor supported the teacher candidate in identifying areas of strength and areas for growth. Together, the supervisor and candidate developed a goal for the next lesson which was to implement collaborative work through the Gradual Release Model, along with strategies like Think-Pair-Share to actively engage her students in the learning process.

In another observation, the clinical supervisor showed some skilled facilitation in coaching sessions. She actively listened, summarized some specific points, and offered some targeted support. However, they did not exhibit consistency in feedback to the candidate to transfer learning into a later lesson. For instance, the candidate shared one student had "been trouble all day." The supervisor did not engage in a discussion to develop a specific plan to address challenging students. The supervisor provided some constructive feedback such as noting that students were ready to get up and move and commended the candidate on her timing but seemed to gloss over the candidate's reflection that she should have explained the instructions at the beginning of the activity.

### Metric 4: Quality of feedback to candidates APPROACHING

Candidates sometimes receive high-quality feedback. Clinical supervisors conduct four formal lesson observations during the final internship semester that include a pre- and post-conference. The EPP provided examples of written feedback aligned to the Aspiring Teachers Rubric.

Clinical Experience focus group participants in Elementary and PE programs shared different experiences. All three participants talked about their experiences with micro-teaching. Only one candidate felt like they received adequate feedback, "I have done several microteaches (modeled Lessons). I felt very prepared to teach. We went over mathematical practices and best practices. Feedback is written and verbal." The other two participants did not have the same experience. One said, "We did microteaches and my supervisor was able to tell me areas I lacked in, but I will say we didn't feel prepared. I was not prepared to give lessons. I felt I underperformed because I wasn't given the tools I needed." and the other participant said, "I never got feedback on microteaches."

Clinical Supervisor focus group participants shared that written feedback is provided on all observations and candidates will submit assignments early for guidance and feedback. All observations are rooted in the Aspiring Teacher Rubric as of the Fall 2024 semester.

**Criteria 2.2c: Strong partnerships exist between the EPP and K12 schools and districts that facilitate the development of strong candidates**

**APPROACHING**

**Metric 1: Quality of partnership with districts/schools**

**APPROACHING**

Collaborative processes are somewhat in place with partner schools to co-construct the clinical experience. CBC provided an MOU that listed partner schools and detailed expectations for schools, CBC, mentor teachers and teacher candidates. They also provided Teacher Education Advisory Board agendas that show CBC is working with partner schools to redesign the clinical experience to meet yearlong residency requirements.

School Partners focus group participants spoke strongly of the quality of candidates and their ability to manage a classroom, while also having strong instructional skills for student success. The EPP has a consistent structure in place for candidate placements, however, one participant shared their process is informal. Another participant highlighted communication challenges and delays in candidate placements. District partners identified classroom management as an area of strength but noted student assessment skills have diminished in recent candidates.

**Metric 2: Support and development for clinical supervisors**

**APPROACHING**

Collaborative processes to support and develop clinical supervisors are inconsistent. When a supervisor is hired, they are onboarded and provided with the Internship Supervisor Handbook. They also meet with the Dean to review materials and expectations. However, no evidence of ongoing support was submitted.

Both Clinical Supervisor focus group participants shared recent professional development they've completed, including Aspiring Teacher Rubric training, Coaching Training on AR IDEAS, Magnetic Reading samples to use with Students (HQIM) and SOR Assessor training.

## INDICATOR 2.3: DEVELOPMENT

**Criteria 2.3a: Candidates are successful with their program coursework**

**APPROACHING**

**Metric 1: Candidate proficiency in coursework**

**MEETS**

The "GPA Comparison Chart" shows that all teacher candidates enter the program with at least a 2.8 GPA (though 12 out of 14 have 3.1 or higher). Three of four candidates graduated with a higher GPA than at entry (the other GPAs are unknown), however, nine out of 10 candidates passed the teacher work sample in 2022-23 and nine out of 11 passed in 2021-22.

**Metric 2: Quality of candidate support across coursework**

**APPROACHING**

Candidates are inconsistently provided with individualized support plans if their coursework requirements are off-track. Due to the small size of the college, CBC informally supports candidates as needed. CBC monitors assessment data to track candidate progress in courses and course instructors meet with candidates as needed.

CBC provided a candidate support plan template that outlines concerns, expectations, action steps, support and timeline. However, no evidence of what this plan looks like in action or how candidates take an active role in monitoring it was provided. The review team learned that CBC began to implement a more formal support process in Fall 2024 that includes documentation.

### Criteria 2.3b: Candidates are successful in their clinical internship

#### MEETS

#### Metric 1: Candidate attainment of clinical internship goals and milestones

##### MEETS

CBC provides a clear list of expectations that candidates must meet to earn their teaching license, as outlined in the "CBC Teacher Education Program Completion Checklist." This includes completing all program requirements, passing Praxis scores, passing score on Teaching Performance Assessment and submitting the TESS Portfolio assessment. In the 2023-24 cohort, 60% of candidates earned their teaching license. Seven out of 10 candidates passed their PLT exam in 2022-23, while nine out of eleven passed in 2021-22.

All Clinical Experience focus group participants agreed they know program goals and milestones and are on track to meet them. Participants stated, "Goals and milestones are the work assigned. In a 120 block, a unit plan is created, and you must make a 70% or above or repeat the assignment. You must pass all Praxis exams and the Foundations of Reading test prior to internship." All participants agreed that all goals and milestones are in the binder they receive for their internship. One candidate reported, "I just stay on track by keeping up with due dates."

#### Metric 2: Candidate impact on student growth

##### MEETS

There is adequate evidence candidates can impact student growth. Key Assessment #5 provides candidates an opportunity to analyze student learning and how their performance impacts student growth. In this assessment, candidates are required to examine samples of student work and assessments to determine the future planning of lessons and work provided to classes.

Clinical supervisors reinforced this in the focus group by sharing more about the assessment saying candidates complete a teacher work sample where they create a lesson with a pre-assessment and then design and facilitate instruction, give a post-assessment and analyze data.

One candidate shared that she utilized the school adopted literacy HQIM and formatively assessed students throughout her lesson by questioning and observation. The lesson concluded with an exit ticket for students. Based on data collected, she said, "I can use that information to help those that struggle to practice; with their library book, or in small groups."

#### Metric 3: Candidate proficiency in effective teaching skills

##### MEETS

CBC provided effectiveness scores for two candidates who graduated Fall 2024. Both candidates scored "effective" on their final summative evaluations and averaged a rating of "effective" on their four formal observations during their internship semester.

#### Metric 4: Quality of candidate support across clinical internship

##### APPROACHING

Struggling students are sometimes provided with an individualized support plan if their development is off-track. CBC submitted a plan that outlines candidate support provided if needed. However, there was no evidence of an active support plan or of the steps candidates take to monitor progress. CBC shared that in Fall 2024 they began to formalize their support plan and since they are a small program, they frequently check in with candidates and support them as needed.

In the Clinical Supervisor focus group, one supervisor described a candidate who was struggling with classroom management at the elementary level and the intervention provided, but specific documentation of support was minimal.

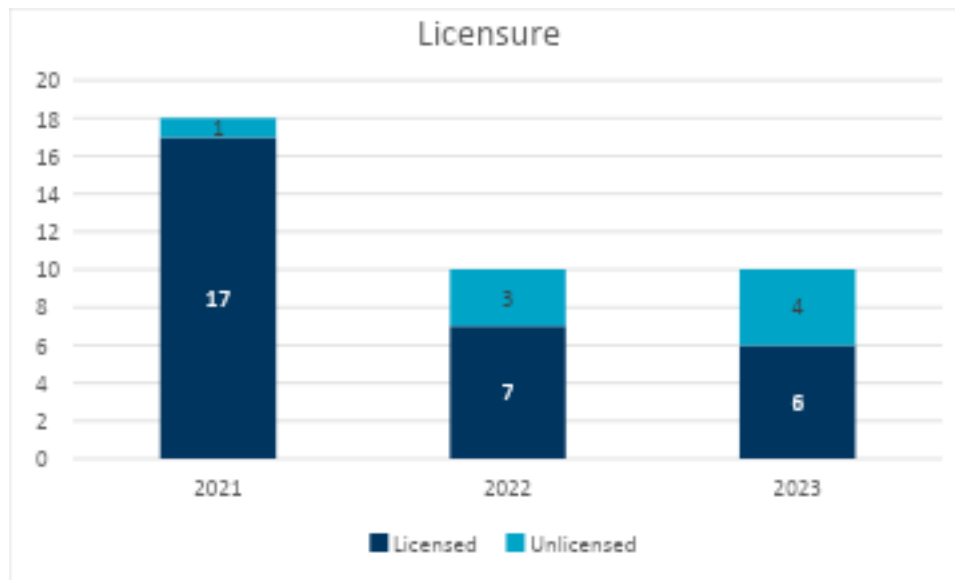

Some high performing candidates receive opportunities and feedback that encourage their retention. Clinical supervisors shared that some interns were recognized at an awards program for outstanding performance during their clinical internship. However, no additional evidence was provided in other focus groups or in documentation.

## STANDARD 3: SUPPORTING WORKFORCE NEEDS

| Standard 3 Performance Level                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                             |                                |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|--------------------------------|
| MEETS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                             |                                |
| Indicator Performance Levels                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                             |                                |
| Indicator 3.1<br>Licensure                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Indicator 3.2<br>Employment | Indicator 3.3<br>Effectiveness |
| APPROACHING                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | EXCEEDS                     | EXCEEDS                        |
| Recommendations                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                             |                                |
| <p>Recommendations include:</p> <ul style="list-style-type: none"> <li>Establish programmatic support to ensure that traditional program completers are prepared to obtain standard licensure immediately following completion, including passing the content exam on their first try. <i>(Focus Areas: Criteria 3.1a and 3.1c)</i></li> <li>Analyze <a href="#">EPP Completer Supervisor Survey</a> and <a href="#">EPP Completer Survey</a> results to identify specific domains and components for which both supervisors and candidates do not feel their program prepared them well to become a teacher. <i>(Focus Areas: Criteria 3.3a and 3.3b)</i></li> </ul> |                             |                                |

### INDICATOR 3.1: LICENSURE

| Criteria 3.1a: A high proportion of program candidates obtain a standard license             |        |                           |                   |
|----------------------------------------------------------------------------------------------|--------|---------------------------|-------------------|
| Metric                                                                                       | Target | EPP's Percentage Licensed | Performance Level |
| Percentage of completers who have earned a standard license within one year after completion | 80%    | 79%                       | MEETS             |

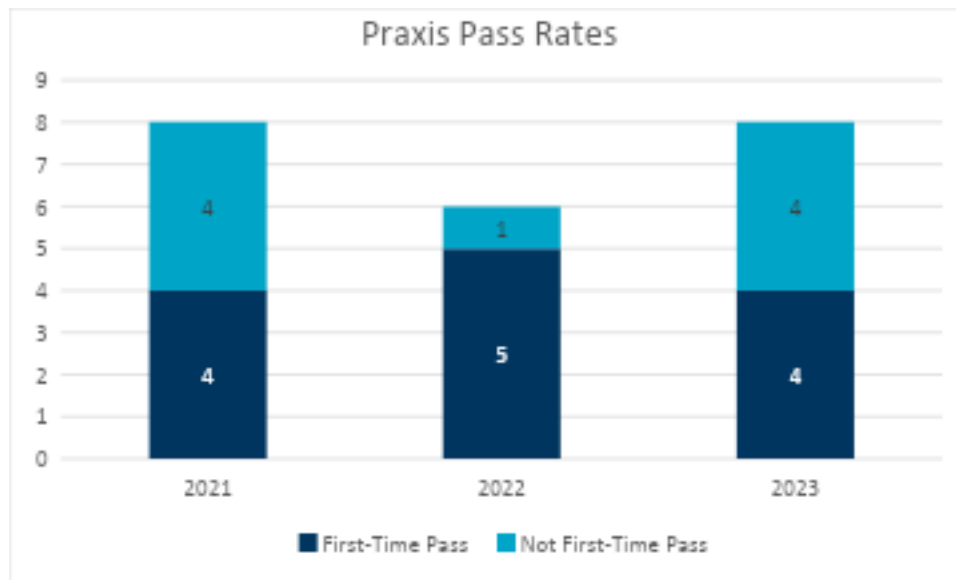

**Criteria 3.1b: A high proportion of alternative route enrollees are provisionally licensed**

| Metric                                                                            | Target | EPP's Percentage Licensed | Performance Level |
|-----------------------------------------------------------------------------------|--------|---------------------------|-------------------|
| Percentage of employed alternative route enrollees who are provisionally licensed | 73%    | n/a                       | n/a               |

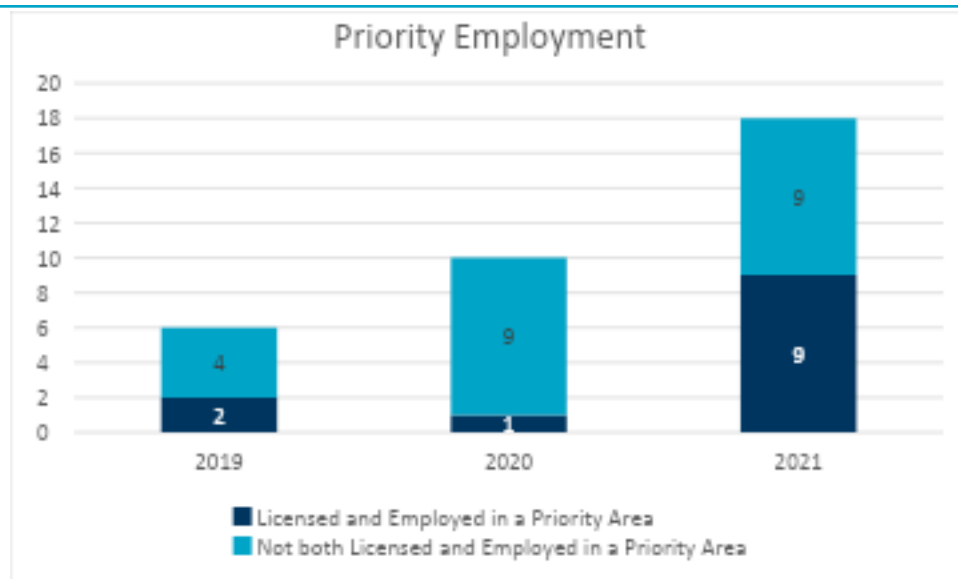

**Criteria 3.1c: A high proportion of traditional program candidates pass the content exam in their area on the first try**

| Metric                                                                           | Target | EPP's First-Time Pass Percentage | Performance Level |
|----------------------------------------------------------------------------------|--------|----------------------------------|-------------------|
| Percentage of first-time licensure exam test takers that pass on their first try | 66%    | 59.1%                            | APPROACHING       |

## INDICATOR 3.2: EMPLOYMENT

| Criteria 3.2a: A high proportion of completers are employed in Arkansas public schools                                                                                                                                                                                                                                                                                                                                                                |                       |                                    |                   |      |                       |                                |       |      |   |   |   |      |   |   |    |      |    |   |    |

| Criteria 3.2b: A high proportion of completers work in high-priority Arkansas public school districts and subjects                                                                                                                                                                                                                                                                                                                                    |                       |                                    |                   |      |                       |                                |       |      |   |   |   |      |   |   |    |      |    |   |    |
| Metric                                                                                                                                                                                                                                                                                                                                                                                                                                                | Target                | EPP's Percentage Employed Priority | Performance Level |      |                       |                                |       |      |   |   |   |      |   |   |    |      |    |   |    |
| Percentage of completers who are licensed and gain employment in high-priority Arkansas public school districts and subjects in their first three years after completion                                                                                                                                                                                                                                                                              | 39%                   | 35.3%                              | MEETS             |      |                       |                                |       |      |   |   |   |      |   |   |    |      |    |   |    |

\*Priority Employment is employment in a high-need subject area and/or geographical shortage area. Shortage Areas are based on an analysis of 3yrs of data related to teacher supply (EPP pipeline) and demand (unlicensed teachers, attrition, deceased) and state focus areas.

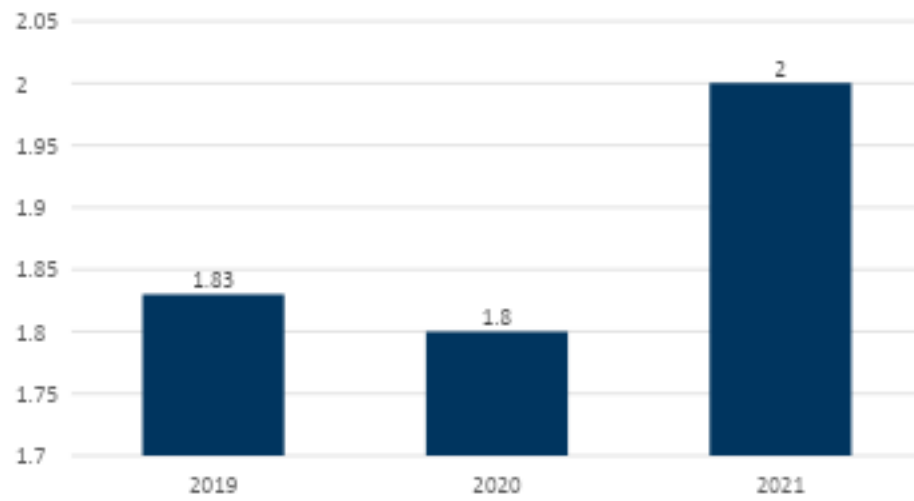

Current subject shortage areas for employment: Secondary Science, Foreign Language, Secondary Math, Middle School Math, Middle School Science, and Special Education.

Current geographical shortage areas are school districts located in the following co-op regions: Arkansas River ESC, Great Rivers ESC, Pulaski Co Schools, Southeast AR ESC.

**Criteria 3.2c: Program completers remain in the classroom for multiple years**

| Metric                                                                                                         | Target | EPP's Average Years of Experience, 3 Years After Completion | Performance Level |
|----------------------------------------------------------------------------------------------------------------|--------|-------------------------------------------------------------|-------------------|
| Program completers' average licensed teaching experience in Arkansas's public schools 3 years after completion | 1.8    | 1.91                                                        | EXCEEDS           |

Average Experience 3 Years After Completion

## INDICATOR 3.3: EFFECTIVENESS

| Criteria 3.3a: School leaders rate program completers that they hire as effective classroom teachers                                                                 |        |                                                        |                   |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------------------------------------------------------|-------------------|
| Metric                                                                                                                                                               | Target | EPP's Average Percentage of Agree+ on all Survey Items | Performance Level |
| School leaders' perception of program completer effectiveness based on responses to the EPP Completer Supervisor Survey conducted annually by the DESE               | 78%    | 75%                                                    | MEETS             |
| Criteria 3.3b: Completers feel that their program prepared them well to be a teacher                                                                                 |        |                                                        |                   |
| Metric                                                                                                                                                               | Target | EPP's Average Percentage of Agree+ on all Survey Items | Performance Level |
| Program completers' perception of how well their program prepared them to be a teacher based on responses to the EPP Completer Survey conducted annually by the DESE | 79%    | 80%                                                    | EXCEEDS           |
| Criteria 3.3c: A high proportion of program completers have above-average value-added scores                                                                         |        |                                                        |                   |
| Metric                                                                                                                                                               | Target | EPP's Percentage with Average Value-Added of 80+       | Performance Level |
| Percentage of program completers who have above-average value-added scores in their first three years after completion                                               | 43%    | 58%                                                    | EXCEEDS           |
