

STATE REVIEW LEARNINGS:

CROWLEY'S RIDGE COLLEGE

TRADITIONAL

On-Site Review: October 22-23, 2024

WHAT'S IN THIS REPORT?

The report uses evidence from state data collection and an onsite review to examine educator preparation program performance. The information in this report is meant to inform a continuous improvement process that takes educator preparation programs closer to the goals needed to serve Arkansas's students.

This report rates the EPP on all three Standards of the Arkansas Education Preparation Provider State Review Framework, which are fundamental to support teacher candidates in their journey to becoming successful teachers who meet the needs of students in Arkansas:

- Standard 1, "Candidate Recruitment and Completion," is rated primarily with quantitative data from state data collection.
- For Standard 2, "Preparing Candidates Effectively," criteria to assess performance results from document review, observations, and focus group conversations with stakeholders, including teacher preparation program deans, candidates, current school leaders and teachers, faculty, and the DESE staff.
- The ratings for Standard 3, "Supporting Workforce Needs," are based on state data reporting.

Performance Levels are defined as follows:

Performance Level	Average Score Equivalent
EXCEEDS	Average score equivalent to exceeds on two of three standards or indicators
MEETS	Average score equivalent to meets on all three standards or indicators
APPROACHING	Average score equivalent to approaching on one standard or indicator and meets on the other two
BELOW	Average score equivalent to below on one standard or indicator and approaching on the other two

CROWLEY'S RIDGE COLLEGE

TRADITIONAL

Overall Performance Level		
APPROACHING		
Performance Levels by Standard		
Standard 1: Recruitment & Completion	Standard 2: Preparing Candidates Effectively	Standard 3: Supporting Workforce Needs
MEETS	APPROACHING	MEETS

STANDARD 1: RECRUITMENT & COMPLETION

Standard 1 Performance Level		
MEETS		
Indicator Performance Levels		
Indicator 1.1 Plans	Indicator 1.2 Recruitment	Indicator 1.3 Completion
MEETS	APPROACHING	MEETS
Recommendations		
Recruiting additional candidates to increase overall enrollment, and particularly in subject shortage areas, will support the program's Standard 1 performance moving forward. Additionally, consider what additional supports those candidates may need to increase the 3-year completion rate. <i>(Focus Areas: Criteria 1.2b, Criteria 1.3a)</i>		

INDICATOR 1.1: PLANS

Criteria 1.1a: Programs have formal plans to meet the targets described in the state review framework (i.e., Standards 1-3) and show evidence of acting on their plans	
Performance Level	Explanation
MEETS	Through its Annual Plan, Crowley's Ridge exhibits a mindset toward growth and improvement for their teaching candidates.

INDICATOR 1.2: RECRUITMENT

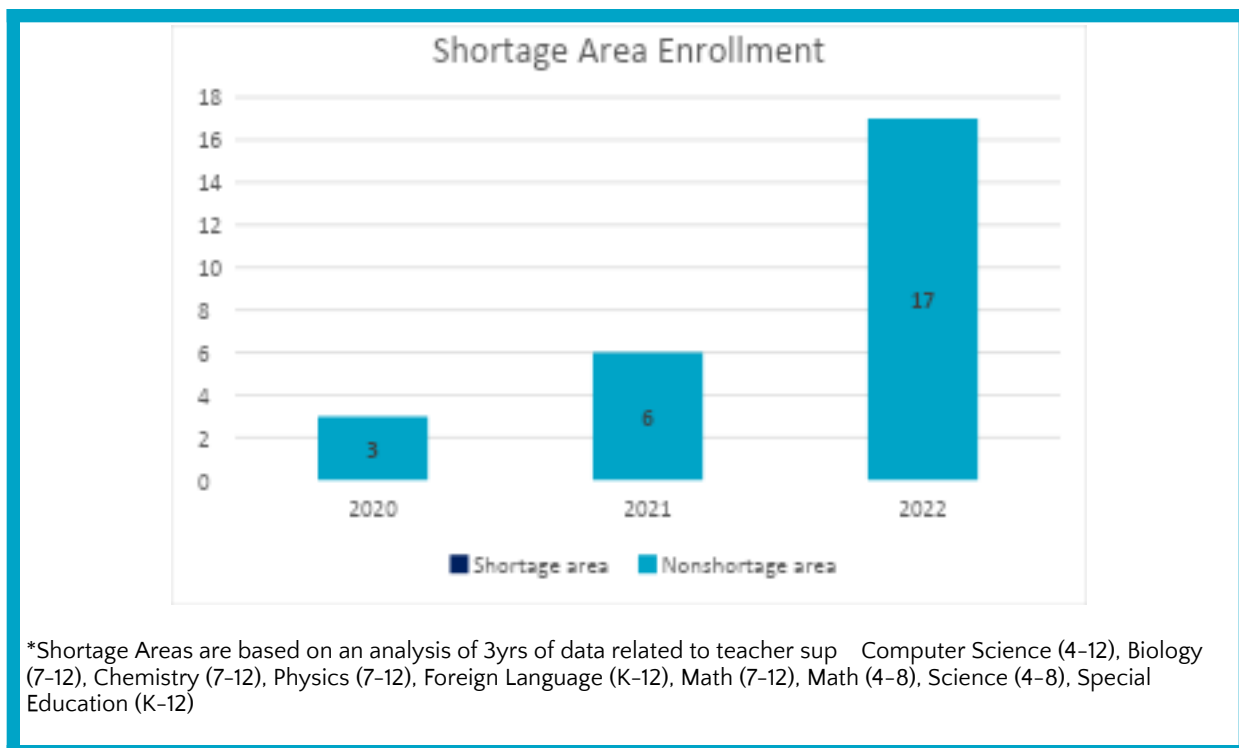

Criteria 1.2a: Programs meet annual recruitment targets that align with their program size and Arkansas's workforce needs			
Metric	Target	EPP's Percentage Growth in 3yr Average Enrollment	Performance Level
Percentage growth in 3yr average enrollment	10%	30%	Exceeds

Metric is the percentage growth between blue and green boxes.

Year	Percentage Growth
2017	9
2018	5
2019	6
2020	3
2021	6
2022	15

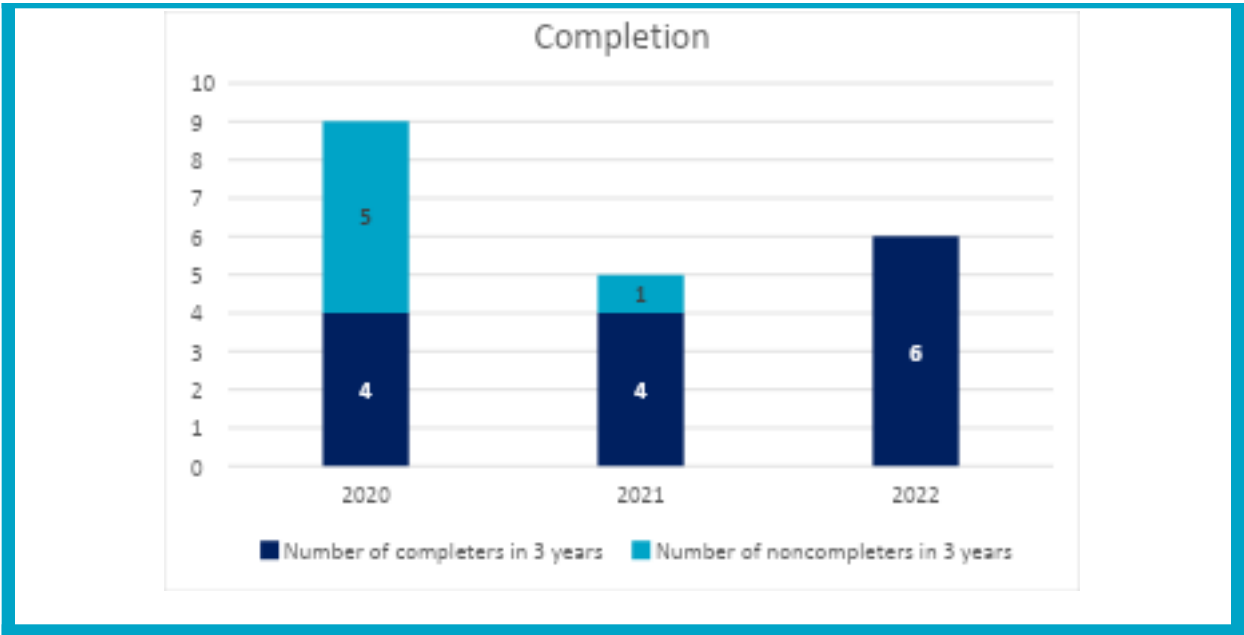

*The enrollment growth target was established with the aim of closing the sizeable gap between EPP completers and those leaving the classroom over the next 10yrs. EPPs can earn a “Meets” rating by demonstrating positive program enrollment growth (i.e., growth greater than zero) and an “Exceeds” rating by demonstrating growth greater than 10 percent.

Criteria 1.2b: Programs recruit candidates for Arkansas certification shortage areas in proportion to the need			
Metric	Target	EPP's Percent of New Enrollees in Shortage Areas	Performance Level
Percentage of program candidates recruited in shortage areas	24%	0%	Below

INDICATOR 1.3: COMPLETION

Criteria 1.3a: Candidates have high rates of completion			
Metric	Target	EPP's 3-Year Completion Rate	Performance Level
Three-year average completion rate	74%	70%	Meets

Standard 2: PREPARING CANDIDATES EFFECTIVELY

Standard 2 Performance Level		
APPROACHING		
Indicator Performance Levels		
Indicator 2.1 Coursework	Indicator 2.2 Clinical Experiences	Indicator 2.3 Development
APPROACHING	APPROACHING	APPROACHING
Recommendations		
Teacher candidates are adequately supported in their coursework at Crowley's Ridge College. Course Instructors support all candidates throughout the program, resulting in strong proficiency across programs. Recommendations to strengthen candidate preparation include: - Audit coursework for classroom connections, ensuring instructors provide models of instruction, incorporate high-quality instructional materials, clearly and intentionally familiarize candidates with Arkansas K-12 Standards, and reflect with participants on alignment between coursework and classroom. (<i>Focus Areas: Criteria 2.1a Metrics 1 and 2, Criteria 2.1b Metric 3</i>) - Begin preparing now to meet the state's one-year residency requirement that will apply to spring 2027 completers and beyond. Formalize systems and structures to ensure that mentor teachers and clinical supervisors working with candidates in the building are experienced, very effective and, by the 2026-2027 school year, have received DESE-recognized coaching training. (<i>Focus Area: Criteria 2.2b, 2.3c Metric 2</i>) - Outline clear goals and milestones for clinical experience and document a clear and intentional process to fully support teacher candidates who may fall behind that allows CRC staff and candidates to actively monitor their progress (<i>Focus Areas: Criteria 2.3b Metrics 1 and 4</i>)		

INDICATOR 2.1: COURSEWORK

Criteria 2.1a: Candidates receive high-quality program coursework that is evidence-based
APPROACHING
Metric 1: Incorporation and demonstration of best practices around content instruction APPROACHING Coursework incorporates some nationally recognized best practices around content instruction. Several syllabi note analysis and evaluation of curriculum; however, reviewers did not see any references to HQIM. In the Course Instructor focus group participants mentioned HQIM material such as Wit and Wisdom and Haggerty are available for faculty and candidates to use. Training in the materials has not occurred yet, however, participants said that strategies are now in place to better support faculty and therefore candidates. Currently, they use Cengage textbooks to ensure content is appropriate, although they also mentioned the need to supplement the curriculum with additional resources to make it relevant to candidate experiences. In the Coursework focus group, most participants were PE majors. As a result, it was difficult to ascertain the level of best practice for HQIM and Science of Reading proficiency for all Elementary majors. One K-6 candidate mentioned

they connect their lesson plans with the curriculum that is being used in K-12 classrooms and that there is some HQIM available to them to use.

Reviewers observed three course observations but did not see any references to HQIM or Science of Reading. In Educational Psychology (EFD303), reviewers noted, "Content for the class discussion rested on a foundation of earlier course work, with anchor charts from previous class discussion brought out to reinforce recall of concepts such as types of learning (observation, social, experiential, cognitive). This content served as a basis for talking about how the roles of the teacher and student may change with different types of learning." They also noted the course provided consistent opportunities for candidates to respond to questions that were both recall ("what is a schema") and involved considering what was happening in the type of learning ("if you do a field lesson – is that assessment the only thing used to assess learning – what else did you use?").

CRC is in compliance with DESE requirements for SoR. For the awareness level, CRC PE candidates take the SOR modules in IDEAS during internships.

Metric 2: Incorporation and utilization of Arkansas K12 Standards in coursework as a foundation for teacher development
APPROACHING

Coursework somewhat familiarizes candidates with Arkansas Academic K-12 Standards. There is a lack of consistency in reference to Arkansas K-12 Standards throughout course syllabi and lesson plans. Many of the syllabi reference Common Core Standards. Arkansas K-12 Standards are introduced in one of the foundational courses, including how to locate and interpret them. Five candidates in the Coursework focus group talked about how lesson plans incorporated standards. In course observations, reviewers did not note any explicit connection between the lesson and standards. In one observation, the reviewer noted, "candidates were not provided any opportunities to use AR K-12 PE Standards within the course period to align the content discussed within the class period. Therefore, there was no observed use of the Arkansas K-12 PE Standards."

Coursework provides candidates with some opportunities to vertically integrate standards throughout all grade bands within the licensure area. Although there was no reference to vertical integration of standards in any of the syllabi, in the Coursework focus group, five teacher candidates were able to talk about lesson plans aligning to standards. One candidate spoke about how she has been learning that the same content would look different with different grade levels. Another candidate spoke about how a K12 book could be effectively utilized in two different grades focused on different aspects of literacy. However, none of the candidates were able to provide examples of activities where they were able to rewrite lessons for various grade levels within their content licensure grade bands or other ways candidates could better understand standards across or within grade levels.

The new lesson plan format (implemented in fall 2024) now includes a section on prior knowledge. One purpose for this section is for candidates to be able to address what knowledge and experiences students should have prior to the planned lesson – using standards to identify if a lesson objective is new knowledge or if the students have some prior experience with the content or skills.

Criteria 2.1b: Candidates' coursework supports their development as a teacher
APPROACHING

Metric 1: Sequence and progression of courses
APPROACHING

There is mixed evidence to confirm how courses are sequenced and how they increase in rigor throughout programs of study. Documentation shows that courses and programs of study include checkpoints for reinforcement opportunities for candidates. Degree plans show the progressions and sequencing of coursework and connections to program checkpoints and transitions, and degree maps show the mapping of required coursework by term in sequential order.

However, Course Instructor focus group participants said there is not a clear sequence and indicated they will be implementing a newly approved program beginning fall 2025. The new program will identify sequences like Psychology to Educational Psychology; College Algebra to Math I to Math II and will include a new science course after eight hours of general education coursework; Foundations of Reading (taken by all) which will be based on the AR IDEAS Awareness lessons; Elementary Education, completed with Emergent Literacy, and then Literacy Assessment to meet SOR proficiency requirements. The responses from teacher candidates participating in the Coursework focus group also suggested that course sequence was in the midst of changes. Although they provided

consistent assurance that they felt prepared both to know the content needed (such as being able to pass Praxis licensure exams) and teach that content, one candidate articulated that she was “between programs” and her field experiences were different from students before and after her in terms of program progression.

Metric 2: Incorporation and utilization of Arkansas Educator Competencies and Arkansas Teaching Standards in coursework

APPROACHING

Coursework incorporates Arkansas Educator Competencies and Arkansas Teaching Standards in a way that partially develops candidates to meet the competencies of their required licensure area. Documentation shows that students reflect on InTasc standards with a formal analysis as part of their final portfolio for each field experience. They are required to demonstrate evidence of each of the ten InTasc standards by completing ten observation reports with analysis. Most of the syllabi submitted show clear alignment to teaching standards and educator competencies.

In the Coursework focus group, candidates were able to state that ATS was used as a foundation for assignments in their introduction course and had opportunities to identify standards in field observations. One participant shared, “During Field I, we had to go and write what we saw, and the reflection aligned to ATS.” They did this multiple times, focusing on a different standard.

Candidates seemed unfamiliar with TESS or Aspiring Teacher Rubric. One candidate said that a lesson plan they wrote and presented to their instructor was graded with a rubric which echoed the four levels of the TESS/Aspiring Teacher. However, the candidate shared that the program does not explicitly use shared terms such as ATS and Educator Competencies. Planned program revisions will provide better opportunities for candidates to identify alignment between coursework, standards and competencies. In the three course observations, reviewers did not observe direct references or incorporation of Arkansas Teaching Standards or Arkansas Educator Competencies. In the Coursework Observation for Educational Psychology (EFD303), reviewers said, “Educator competencies were not included on the syllabus. ATS and ISTE are listed on the syllabus but not connected to course outcomes or assessments and ATS was not observed during course discussion despite course content including appropriate opportunities such as talking about instructional methods and assessment. While there were no clear and intentional connections made for candidates to the specific ATS, the instructor clearly understands ATS as he spoke indirectly about them.”

Metric 3: Alignment of coursework to clinical experience

MEETS

Coursework is aligned to clinical experiences and candidates have opportunities to reflect on the alignment with their clinical supervisor and course instructors throughout the program. Finding and documenting evidence of coursework applications in field experience is included in the required candidate portfolio. Two candidates in the Coursework focus group provided specific statements to support their belief that coursework is connected to field experiences. One teacher candidate said when she observed a K-2 PE class, she saw content she was learning in class in the K-2 classroom. Another teacher candidate was learning about Tier 1, 2, 3 and could see it when observing in classrooms.

In two of the three course observations, reviewers noted evidence of alignment from coursework to clinical experience. During the Language Arts in the Elementary Grades course observation, one reviewer noted, “candidates had opportunities to connect class content to prior work in the course and think about how the different styles of learning would impact the roles of the teacher and student”. Reviewers noted that the Educational Psychology course “underscored to candidates how their content would and could be implemented in the classroom.”

Criteria 2.1c: Candidates are provided with knowledgeable and effective course instructors

APPROACHING

Metric 1: Quality of course instructors

APPROACHING

Some course instructors demonstrate a deep understanding of Arkansas K-12 Standards, content knowledge and content pedagogy. Almost all instructors hold an Arkansas educator license. However, only one instructor has been

trained in the Aspiring Teacher Rubric, and recent professional learning experience is not documented for most instructors. The narrative CRC submitted explains that they are working on getting certified coaching training completed for those instructors that will potentially be in the field with candidates. CRC plans to have this completed before the beginning of the next academic year. In two of the three observations reviewers noted deep knowledge about content and pedagogy, but reviewers did not observe integration of K-12 Standards. All three participants in the Course Instructor focus group spoke about keeping current with new content and the importance of knowing what is happening in K12 schools to help candidates prepare for teaching. One instructor mentioned being active in the science research community. One instructor spoke about maintaining the credentials required for his coaching position. The third instructor talked about participating in local school professional development for CKLA, one of the approved HQIM.

Metric 2: Effectiveness of course instructors MEETS

Course instructors demonstrate support and provide feedback to teacher candidates. All candidates participating in the Coursework focus group agreed they feel supported by their course instructors and receive feedback about their strengths and growth areas. In the Course Instructor focus group, all three instructors shared that feedback is given regularly and connected to the Aspiring Teacher Rubric. In all three observations, reviewers noted strong supportive relationships with the candidates, stating, "candidates were largely engaged during the observations." Candidate support is one of CRC's strengths that was very evident, and all course instructors demonstrated evidence of this throughout the review team's observations.

INDICATOR 2.2: CLINICAL EXPERIENCES

Criteria 2.2a: Candidates are provided clinical experiences throughout their program that support their development as a teacher APPROACHING

Metric 1: The sequence of clinical experiences APPROACHING

The overall sequence of clinical experiences provides some opportunity for learning and development. Candidates complete three field experiences: Field I is strictly observational and includes 10 observations, Field II provides opportunities for candidates to tutor, and micro teach, and Field III is a semester-long field experience which includes two eight-week student teaching opportunities. While these experiences build upon each other, during the Clinical Experience focus group, most participants expressed confusion and frustration about the overall degree plan, sequence of classes, frequency of offerings, and opportunities for professional development. Candidates felt that Field I did not prepare them for subsequent clinical experiences, as there was little to no interaction with teachers or students. However, they mentioned Field II was helpful, as it gave them exposure to students through tutoring and microteaching. No focus group participants were in their final internship semester so could not provide insight into the Field III clinical experience opportunity. Some of this confusion may have been expounded by changes in leadership within the program. CRC is currently working to restructure the clinical experience component of their program to include more opportunities for candidates to plan and teach lessons.

Metric 2: The variety of clinical experiences APPROACHING

The overall variety of clinical experiences provides some opportunities for candidates to work with students of varied learning needs. CRC partners with five schools across the state and each partner school is placed in a category based on their student population demographics. According to the handbook, teacher candidates must complete a field experience from one school in each category. However, participants in the Clinical Supervisor focus group shared that "teacher candidates get to choose where they complete their internship" and therefore, the variety of clinical experiences is not always intentional and sometimes limited. Candidates confirmed this in the Clinical Experience focus group. However, they also mentioned that in Field II, they had the opportunity to provide interventions to students with varied learning needs including those with 504s, IEPs and ELLs. Candidates reported positive interactions with school interventionists regarding their students and felt their input and student impact was acknowledged.

CRC also mentioned that they are in the process of expanding their list of partner schools and plan more opportunities to work with students with varied learning needs.

Criteria 2.2b: Candidates across the program are provided with an effective clinical internship
APPROACHING

Metric 1: The effectiveness of experienced mentor teachers
APPROACHING

Some experienced mentor teachers are equipped to support and develop a candidate's pedagogical skills. In the "Teacher Preparation Handbook", there are clear expectations for the role of the mentor teacher, and CRC is developing a form for district and building-level administration that lays out the new state requirements for experienced mentor teachers.

At the time of the review, all participants in the Clinical Experience focus group were in Field II; none of them were in their internship and, therefore none had been assigned an experienced mentor teacher. CRC provided an "Experienced Mentor Teacher List" that included 20 teachers. Five experienced mentor teachers hold the master lead teacher designation, almost all are certified, and their years of teaching experience range from three to thirty-five years. Recent evaluation scores were not shared.

Note: By 2026-2027, experienced mentor teachers working with year-long residents must have received the DESE-recognized coaching training. [Arkansas Novice Teacher Mentoring Manual](#)

Metric 2: Quality of selection process for experienced mentor teachers
MEETS

There is a clear process in place to select experienced mentor teachers. Principals in the EPP Partnership focus group shared that they select experienced mentor teachers based on degrees, years of experience, and formal TESS evaluations. The "Formal Internship Request" agreement contains a set of criteria teachers must meet to be considered for the role of experienced mentor teacher. CRC usually reaches out to partner schools with the candidate's grade level and subject area to finalize placements and experienced mentor teachers. The selection process is primarily done by building administrators, who make final decisions based on fit.

Metric 3: Quality of clinical supervisors
APPROACHING

In the past, CRC only needed one clinical supervisor due to small cohort sizes. Reviewers heard positive comments related to the chair's new role and reorganization of clinical supervisors, including the hiring of the new clinical supervisor, who holds a master's degree and Licensure in Administration and Supervision, and has experience in building-level administration and therefore, is knowledgeable of field placements in the surrounding area. The clinical supervisor supporting the physical education candidates serves as a coach at the college, which provides easy channels of communication with athletes, who are often in the PE program. The credentials, coaching, and instructional practices of the previous clinical supervisors were not included in the evidence submitted.

Metric 4: Quality of feedback to candidates
APPROACHING

Candidates receive some quality feedback. In all four coaching observations, reviewers observed both written and oral feedback being delivered to candidates. Oral feedback was not explicitly tied to K-12 Standards or Aspiring Teacher Rubric; however, the candidate was given a written feedback form with ratings and suggestions for improvement. Reviewers noted in two observations that feedback was linked to student learning. In two other observations, reviewers felt feedback was generalized and there was a missed opportunity to provide more specific feedback to support candidate development.

Clinical Experience focus group participants shared they have opportunities to practice their lessons with peers before their Field II micro-teaching opportunities. During this time, they receive peer feedback and feedback from their clinical supervisor. Clinical supervisors shared they complete four observations per field experience.

Note: The Aspiring Teacher Rubric must be in use by EPPs by the 2024-25 academic year.

Criteria 2.2c: Strong partnerships exist between the EPP and K12 schools and districts that facilitate the development of strong candidates

APPROACHING

Metric 1: Quality of partnership with districts/schools APPROACHING

CRC is in the process of reforming the Education Advisory Committee to create collaborative processes with school districts to co-construct the clinical experience. Currently, the main lines of communication are between the chair and superintendents, the placement coordinator and building-level admin, and the clinical supervisor. There are currently no formal processes of communication or feedback and evaluation cycles in place between CRC and school partners. In the EPP Partnership focus group, participants from two different schools shared examples of how they work with CRC to determine internship placements.

Metric 2: Support and development for clinical supervisors APPROACHING

The clinical supervisor was recently hired at CRC, and there are plans to have her complete "Coaching Training" through AR IDEAS and the Aspiring Training (Pierce) before the spring semester. She will be shadowing the Education Department Chair during her onboarding. Training requirements and protocols are being developed specifically for the new clinical supervisor. Currently, the "Teacher Preparation Handbook" outlines expectations for the clinical supervisor role.

INDICATOR 2.3: DEVELOPMENT

Criteria 2.3a: Candidates are successful with their program coursework MEETS

Metric 1: Candidate proficiency in coursework MEETS

Most candidates show proficiency in coursework requirements. GPA data indicates that 99% of candidates graduated with a 3.0 GPA or above, and most maintained or improved their GPA throughout the program.

Metric 2: Quality of candidate support across coursework MEETS

Candidates are provided with individualized support plans if coursework requirements are off track. If a student falls below the required GPA, they are required to fill out the Personal Growth Plan (PGP). If they fall below a "C" in any course, they are referred to the Student Success Center. The Student Success Center matches the candidate with a tutor who provides support until the candidate is back on track. In the Course Instructor focus group, the faculty pointed to the Student Success Center as an important resource of support for candidates. The program coordinator indicated he served as the advisor for all candidates and was able to identify if mid-term grades indicated an area of concern. Candidates can be mandated to attend the Student Success Center for periods of time (such as an hour or two per week) where they must focus on a specific class's work/assignments. The Student Success Center also provides assistance with study skills or other strategies that can support students. The college also uses a strategy of "first significant grade" that comes between the beginning of the semester and midterms; this provides an early warning system for student performance.

Criteria 2.3b: Candidates are successful in their clinical internship APPROACHING

Metric 1: Candidate attainment of clinical internship goals and milestones APPROACHING

CRC has a set of clinical experience goals and milestones, and most candidates meet them. Documentation provided examples of milestones such as: observations aligned to the evaluation system, minimum GPA, capstone project, passing the Praxis and being on track for licensure. Of the nine candidates in the Spring 2024 semester, seven completed the program and earned their teaching license. Additional documents provided as evidence include FEI,

FEII and FEIII which outline the requirements for field experience hours. However, candidates in the Clinical Experience focus group did not report having a clear understanding of their goals and milestones, outside of minimal GPA requirements and Praxis expectations. Some candidates expressed frustration with being told they had to graduate later than expected because they had not completed required courses. The clinical supervisor shared that the “quality control gates are being revisited.”

Metric 2: Candidate impact on student growth

MEETS

There is evidence that candidates have capacity to impact student growth. Participants in the Clinical Supervisor focus group shared that coursework tied to Educational Technology allows time for a data analysis workshop where candidates practice collecting, analyzing, and reflecting on student data. “Students do a deep dive with data analysis through ‘assessment autopsies.’” Furthermore, the clinical supervisor has coaching days in place for candidates to analyze artifacts from the field and reflect on their ability to appropriately assess student learning through these discussions. These activities allow for students to gain the capacity to later impact student growth in the field. Participants in the Clinical Experience focus group shared they were able to look qualitatively at work throughout the semester to gauge student progress.

Metric 3: Candidate proficiency in effective teaching skills

BELOW

Few candidates receive a score of “effective” on the EPP’s evaluation system submitted in the document “Spring 2022 First and Second Placement Internship Data.” CRC provided “Placement Internship Data for Spring 2022” which included evaluation ratings for the first and second placements. The document attributes a score of “2” to “progressing” and “3” as “effective.” The average rating from the “CRC Supervisor Rating” tab for both first and second placement is 2.56. Summative evaluation scores were not provided as evidence, nor was data available for cohorts after Spring 2022. CRC explained their data was incomplete due to leadership transitions.

Note: By 2024–25, evidence that the Aspiring Teacher Rubric is in use by EPPs must be shown to meet this metric.

Metric 4: Quality of candidate support across clinical internship

BELOW

Reviewers did not observe evidence of individualized support plans for candidates that are off-track in their clinical experiences. There was no evidence submitted of opportunities to provide high performing candidates with feedback to encourage them to complete the program. Participants in the Clinical Supervisor focus group shared that candidates complete a Professional Growth Plan (PGP), but it appears that these plans are to help students plan improvements for areas of growth identified with their experienced mentor teacher. No examples were submitted for review.

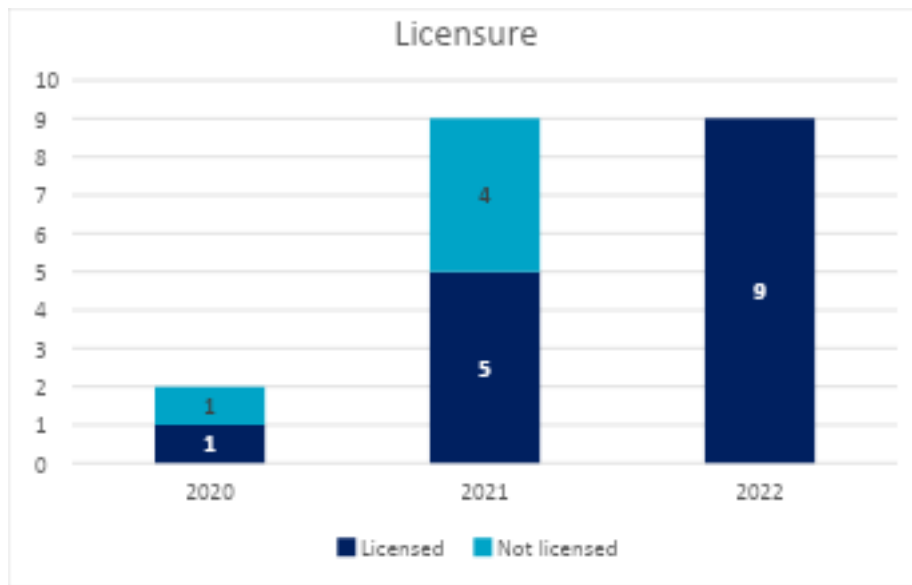

Some participants in the Clinical Experience focus group reported frustration and confusion about their early experiences in the program. One candidate, a senior, reported they have only observed and have not been given an opportunity to microteach yet. Participants reported that the transition from field experiences to internship is difficult. The chair has plans to improve candidate support, requiring all candidates to complete the PGP in Field II and making resources and support services more accessible. In the next academic year, the chair also plans to connect students who are farther along in their coursework with newer students to serve as mentors for coursework and lesson planning. However, these steps have not yet been implemented.

STANDARD 3: SUPPORTING WORKFORCE NEEDS

Standard 3 Performance Level		
MEETS		
Indicator Performance Levels		
Indicator 3.1 Licensure	Indicator 3.2 Employment	Indicator 3.3 Effectiveness
MEETS	APPROACHING	MEETS
Recommendations		
Recommendations include: Although a high proportion (58%) of program completers are employed in Arkansas schools, a low proportion (25%) of completers are working in high-priority districts and subjects. Pursue initiatives to encourage candidates to consider high-priority subject areas and work placements once licensed. (<i>Focus Area: Criteria 3.2b</i>)		

INDICATOR 3.1: LICENSURE

Criteria 3.1a: A high proportion of program candidates obtain a standard license			
Metric	Target	EPP's Percentage Licensed	Performance Level
Percentage of completers who have earned a standard license within one year of completion	76%	75%	Meets

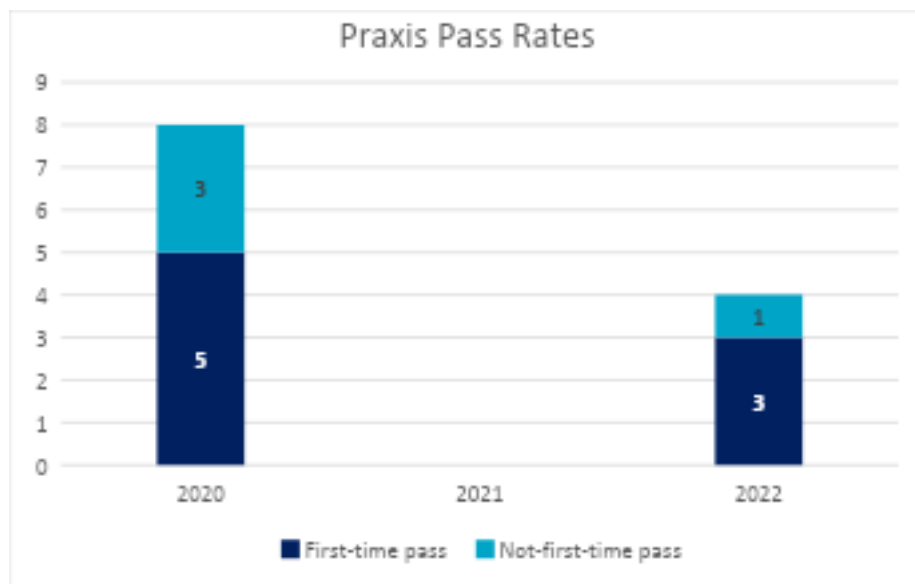

Criteria 3.1b: A high proportion of alternative route enrollees are provisionally licensed

Metric	Target	EPP's Percentage Licensed	Performance Level
Percentage of employed alternative route enrollees who are provisionally licensed	69%	n/a	n/a

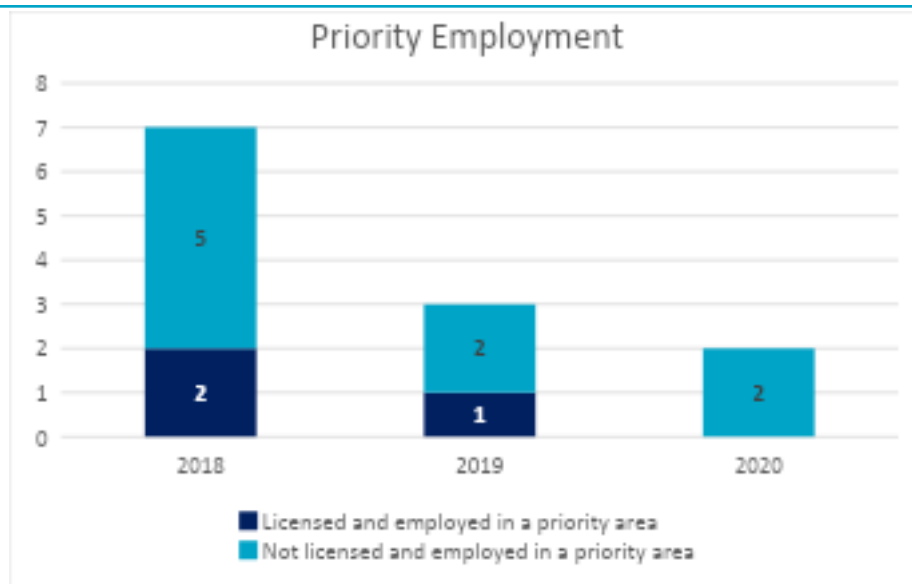

Criteria 3.1c: A high proportion of traditional program candidates pass the Praxis content exam in their area on the first try

Metric	Target	EPP's First-Time Pass Percentage	Performance Level
Percentage of first-time Praxis test takers that pass on their first try	65%	67%	Exceeds

INDICATOR 3.2: EMPLOYMENT

Criteria 3.2a: A high proportion of completers are employed in Arkansas public schools															
Metric	Target	EPP's Percentage Employed	Performance Level												
Percentage of completers who are licensed and gain employment in Arkansas public schools in their first three years after completion	64%	58%	Approaching												
Employment <table><thead><tr><th>Year</th><th>Licensed and employed</th><th>Not licensed and employed</th></tr></thead><tbody><tr><td>2018</td><td>4</td><td>3</td></tr><tr><td>2019</td><td>2</td><td>1</td></tr><tr><td>2020</td><td>1</td><td>1</td></tr></tbody></table>				Year	Licensed and employed	Not licensed and employed	2018	4	3	2019	2	1	2020	1	1
Year	Licensed and employed	Not licensed and employed													
2018	4	3													
2019	2	1													
2020	1	1													
Criteria 3.2b: A high proportion of completers work in high-priority Arkansas public school districts and subjects															
Metric	Target	EPP's Percentage Employed Priority	Performance Level												
Percentage of completers who are licensed and gain employment in high-priority Arkansas public school districts and subjects in their first three years after completion	40%	25%	Below												

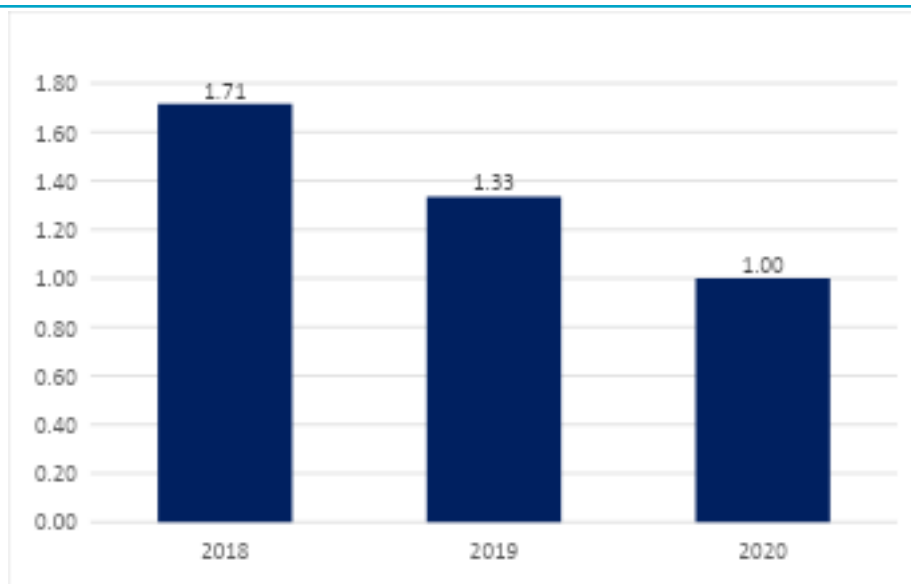

*Priority Employment is employment in a high-need subject area and/or geographical shortage area. Shortage Areas are based on an analysis of 3yrs of data related to teacher supply (EPP pipeline) and demand (unlicensed teachers, attrition, deceased) and state focus areas.

Current subject shortage areas for employment: Computer Science, Secondary Science, Foreign Language, Secondary Math, Middle School Math, Middle School Science, and Special Education.

Current geographical shortage areas are school districts located in the following co-op regions: Arkansas River ESC, Great Rivers ESC, Pulaski Co Schools, Southeast AR ESC.

Criteria 3.2c: Program completers remain in the classroom for multiple years

Metric	Target	EPP's Average Years of Experience, 3 Years After Completion	Performance Level
Program completers' average licensed teaching experience in Arkansas's public schools 3 years after completion	1.7	1.5	Meets

INDICATOR 3.3: EFFECTIVENESS

Criteria 3.3a: School leaders rate program completers that they hire as effective classroom teachers			
Metric	Target	EPP's Average Percentage of Agree+ on all Survey Items	Performance Level
School leaders' perception of program completer effectiveness based on responses to the EPP Completer Supervisor Survey conducted annually by the DESE	81%	100%	Exceeds
Criteria 3.3b: Completers feel that their program prepared them well to be a teacher			
Metric	Target	EPP's Average Percentage of Agree+ on all Survey Items	Performance Level
Program completers' perception of how well their program prepared them to be a teacher based on responses to the EPP Completer Survey conducted annually by the DESE	75%	100%	Exceeds
Criteria 3.3c: A high proportion of program completers have above-average value-added scores			
Metric	Target	EPP's Percentage with Average Value-Added of 80+	Performance Level
Percentage of program completers who have above-average value-added scores in their first three years after completion	43%	0%	Below
