

STATE REVIEW LEARNINGS:

HENDERSON STATE UNIVERSITY

ALTERNATIVE ROUTE

On-Site Review: November 6-7, 2024

WHAT'S IN THIS REPORT?

The report uses evidence from state data collection and an onsite review to examine educator preparation program performance. The information in this report is meant to inform a continuous improvement process that takes educator preparation programs closer to the goals needed to serve Arkansas's students.

This report rates the EPP on all three Standards of the Arkansas Education Preparation Provider State Review Framework, which are fundamental to support teacher candidates in their journey to becoming successful teachers who meet the needs of students in Arkansas:

- Standard 1, "Candidate Recruitment and Completion," is rated primarily with quantitative data from state data collection.
- For Standard 2, "Preparing Candidates Effectively," criteria to assess performance results from document review, observations, and focus group conversations with stakeholders, including teacher preparation program deans, candidates, current school leaders and teachers, faculty, and the DESE staff.
- The ratings for Standard 3, "Supporting Workforce Needs," are based on state data reporting.

Performance Levels are defined as follows:

Performance Level	Average Score Equivalent
EXCEEDS	Average score equivalent to exceeds on two of three standards or indicators
MEETS	Average score equivalent to meets on all three standards or indicators
APPROACHING	Average score equivalent to approaching on one standard or indicator and meets on the other two
BELOW	Average score equivalent to below on one standard or indicator and approaching on the other two

HENDERSON STATE UNIVERSITY

ALTERNATIVE ROUTE

Overall Performance Level		
APPROACHING		
Performance Levels by Standard		
Standard 1: Recruitment & Completion	Standard 2: Preparing Candidates Effectively	Standard 3: Supporting Workforce Needs
APPROACHING	APPROACHING	MEETS

STANDARD 1: RECRUITMENT & COMPLETION

Standard 1 Performance Level		
APPROACHING		
Indicator Performance Levels		
Indicator 1.1 Plans	Indicator 1.2 Recruitment	Indicator 1.3 Completion
MEETS	APPROACHING	APPROACHING
Recommendations		
Recruiting additional candidates, specifically in subject shortage areas, will support the program's Standard 1 performance moving forward. Additionally, consider what additional supports those candidates may need to increase the 3-year completion rate. <i>(Focus Areas: Criteria 1.2b, Criteria 1.3a)</i>		

INDICATOR 1.1: PLANS

Criteria 1.1a: Programs have formal plans to meet the targets described in the state review framework (i.e., Standards 1-3) and show evidence of acting on their plans	
Performance Level	Explanation
MEETS	Henderson presented a reflective plan which addressed their recent institutional challenges and included a strategy for future success.

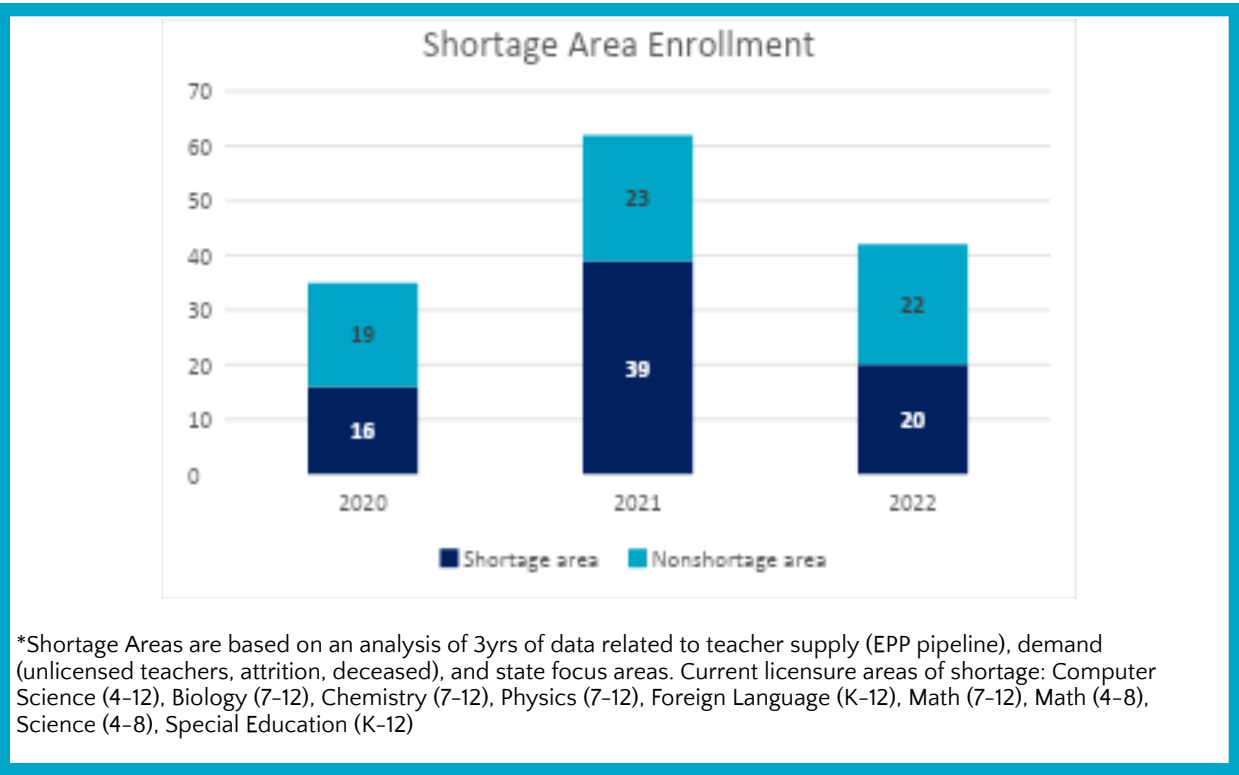

INDICATOR 1.2: RECRUITMENT

Criteria 1.2a: Programs meet annual recruitment targets that align with their program size and Arkansas's workforce needs			
Metric	Target	EPP's Percentage Growth in 3yr Average Enrollment	Performance Level
Percentage growth in 3yr average enrollment	10%	-32.5	BELOW

Year	Percentage Growth
2017	60
2018	85
2019	64
2020	35
2021	62
2022	42

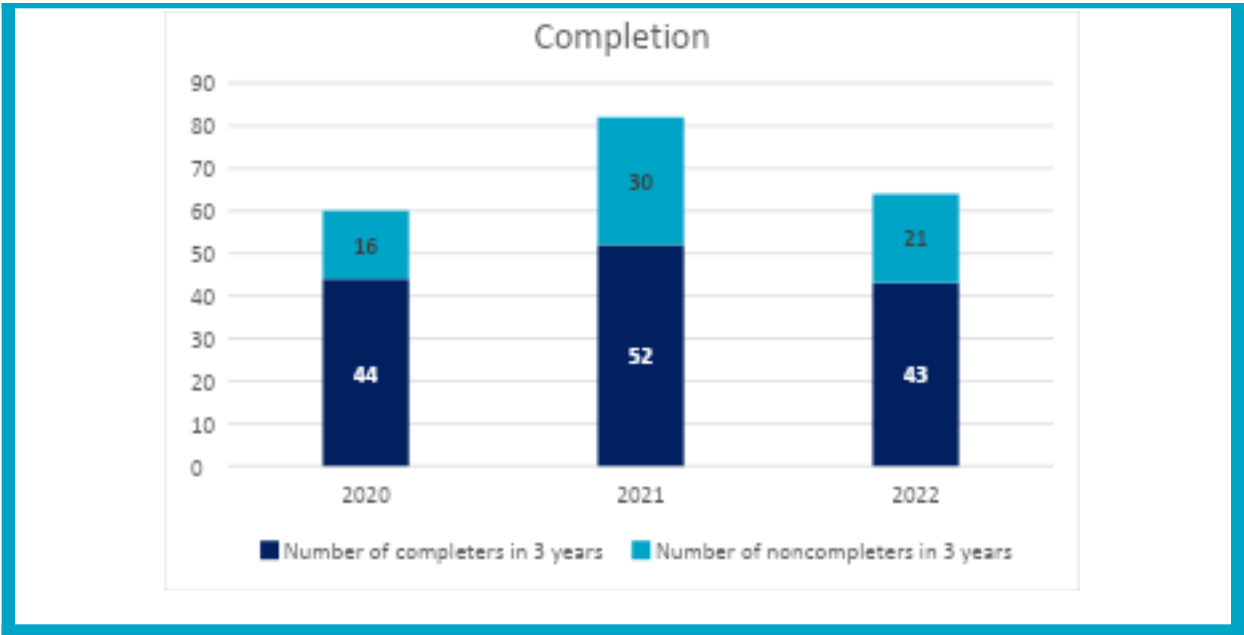

*The enrollment growth target was established with the aim of closing the sizeable gap between EPP completers and those leaving the classroom over the next 10yrs. EPPs can earn a “Meets” rating by demonstrating positive program enrollment growth (i.e., growth greater than zero) and an “Exceeds” rating by demonstrating growth greater than 10 percent.

Criteria 1.2b: Programs recruit candidates for Arkansas certification shortage areas in proportion to the need			
Metric	Target	EPP's Percent of New Enrollees in Shortage Areas	Performance Level
Percentage of program candidates recruited in shortage areas	24%	54%	EXCEEDS

INDICATOR 1.3: COMPLETION

Criteria 1.3a: Candidates have high rates of completion			
Metric	Target	EPP's 3-Year Completion Rate	Performance Level
Three-year average completion rate	74%	67%	APPROACHING

Standard 2: PREPARING CANDIDATES EFFECTIVELY

Standard 2 Performance Level		
APPROACHING		
Indicator Performance Levels		
Indicator 2.1 Coursework	Indicator 2.2 Clinical Experiences	Indicator 2.3 Development
APPROACHING	APPROACHING	APPROACHING
Recommendations		
Henderson State University provided evidence to highlight its commitment to providing MAT candidates with the knowledge, systems, and structures they need to teach in Arkansas schools. Evidence included a series of well-sequenced courses that provide candidates opportunities to build their knowledge, and use skills in real-time in their classes, while also providing ample opportunities for candidates to reflect on their coursework and clinical experience. Course instructors and clinical supervisors demonstrated deep knowledge of content, strong facilitation and positive coaching to support all candidates in the program. Recommendations to strengthen candidate preparation include: - Audit coursework and ensure candidates have intentionally learned to unpack Arkansas K-12 Standards and have opportunities to vertically integrate Standards throughout all grade bands within their licensure area. <i>(Focus Area: Criteria 2.1a Metric 2)</i> - By 2026–2027, EPPs will need to provide evidence that experienced mentor teachers working with year-long residents have received DESE-recognized coaching training. Document a clear process to demonstrate how the university tracks mentor teacher support given to MAT teacher candidates. <i>(Focus Area: Criteria 2.2b Metric 1 and Metric 2)</i> - Document a clear and intentional process to fully support teacher candidates who may fall behind in their coursework or clinical experience that allows HSU staff and the teacher candidate to actively monitor their progress to getting back on track <i>(Focus Areas: Criteria 2.3a Metric 2, 2.3b Metric 4)</i>		

INDICATOR 2.1: COURSEWORK

Criteria 2.1a: Candidates receive high-quality program coursework that is evidence-based
APPROACHING
Metric 1: Incorporation and demonstration of best practices around content instruction APPROACHING Coursework incorporates some best practices around content instruction. Course syllabi evaluate and modify instructional resources and curriculum materials for their comprehensiveness, accurate representation of concepts in the discipline, and appropriateness for learners. In the Coursework Focus group, teacher candidates shared that their coursework is engaging and includes strategies like collaborative discussions and think-pair-shares. Candidates also referenced course texts that emphasize rigor, collaboration, and professional growth and learning. In the Course Instructor focus group, participants shared that candidates engage with HQIM in multiple courses and coursework

assists candidates in evaluating the effectiveness and implementation of HQIM. However, in the evidence submitted, reviewers did not observe HQIM implementation in course syllabi or in course observations.

Metric 2: Incorporation and utilization of Arkansas Academic K-12 Standards in coursework as a foundation for teacher development

APPROACHING

Coursework somewhat familiarizes candidates with Arkansas Academic K-12 Standards throughout all grade bands within the licensure area. Not all syllabi referenced Arkansas Academic K-12 Standards; however, all lesson plans did include them. In the Coursework focus group, candidates shared that they use K-12 Standards to create a unit plan to deliver to their students and that they are observed and assessed specifically for K-12 Standards, instructional alignment, and teaching methods. Candidates also practice aligning course assignments to specific standards. Although there was evidence that candidates are taught how to utilize K-12 Standards, no evidence was submitted that they are taught how to fully unpack them.

Coursework provides candidates limited opportunities to vertically integrate standards throughout all grade bands within the licensure area. Although some evidence was observed through discussion and collaboration with their classmates teaching different grade levels, reviewers did not see evidence in the documentation.

Criteria 2.1b: Candidates' coursework supports their development as a teacher

MEETS

Metric 1: Sequence and progression of courses

MEETS

Courses are clearly and intentionally sequenced across programs of study to build off previous coursework. In the evidence submitted, reviewers observed that courses build over time to scaffold student mastery from classroom management and basic instructional planning in their foundational courses to more rigorous content-specific planning in their later content-based courses. This was most evident in the scaffolding between Reading I: Classroom Reading Instruction (RDG 5303) and Reading II: Classroom Reading Assessment (RDG 5313), as well as the scaffolding between Introduction to Teaching (EDU 6383) and the various methods courses. Courses and program of study design also include checkpoints for reinforcement opportunities for candidates.

Metric 2: Incorporation and utilization of Arkansas Educator Competencies and Arkansas Teaching Standards in coursework

MEETS

Coursework clearly and intentionally incorporates Arkansas Teaching Standards. Of the 13 syllabi reviewed, 10 included specific references to Arkansas Teaching Standards or InTASC standards and aligned them back to the course objectives. In the Course Instructor focus group, participants discussed how InTASC standards are included on the syllabus as a crosswalk with the TESS teacher rubric. Course instructors spoke about how the InTASC standards are included as a guide for structuring the progression of the course and linking all assignments to specific standards. In all coursework observations, reviewers noted evidence of standards. In the MAT SPE Orientation & Practicum (SPE 6160) observation, reviewers noted, the "Instructor goes over InTASC standards and talks about the correlation with ATS. Students will complete an InTASC portfolio with artifacts aligned to appropriate standards. Standards are tiered across field experiences/courses with intentionality."

Metric 3: Alignment of coursework to clinical experience

MEETS

Coursework is clearly aligned to the clinical experience and candidates have opportunities to reflect on the alignment with their course instructor and clinical supervisor. Since all MAT teacher candidates are working as a teacher of record, they are organically connecting their experience to their courses in addition to their residency experience, and they have consistent opportunities to reflect on their experience with their supervisor.

The Student Ompact Project examples that were submitted as evidence show the components of planning, assessment and using standards and curriculum to support student learning. Student assessment data is also included in the Student Impact Project showing a clear impact on coursework and content. Candidates have opportunities to reflect on and articulate the alignment with their course instructors through online discussion boards, the bi-weekly Saturday sessions, and virtual office hours.

In all three observations, reviewers saw a connection between coursework and clinical experiences and noted candidates having the opportunity to reflect on their experiences. In the Classroom Management 7-12 (EDU 5583) observation, several students spoke about how classroom contracts can be utilized for setting high expectations and managing student behavior. The instructor also connected students' reflections to individual components within TESS Domain 2 in response to what was shared in the discussion.

Criteria 2.1c: Candidates are provided with knowledgeable and effective course instructors

MEETS

Metric 1: Quality of course instructors

MEETS

Most course instructors show deep knowledge of Arkansas Academic K-12 Standards, content knowledge and content pedagogy. In the "Course Instructor Roster" submitted as evidence, all course instructors hold current teaching licenses, and five of the six instructors participated in recent professional development. In all three course observations, reviewers noted deep knowledge; and one review team wrote, "The course instructor shows deep knowledge of the Arkansas TESS Teacher Rubric by making deep connections to the rubric throughout her lecture and providing extensive examples to specific components of the TESS rubric". Another reviewer noted, "The course instructor shows a deep knowledge and understanding of the K-12 Standards, literacy content, and pedagogical knowledge for the teaching of literacy. The instructor has been trained in the Science of Reading, has experience as a dyslexia therapist, and is currently enrolled in a doctoral reading program."

Metric 2: Effectiveness of course instructors

MEETS

Most course instructors have a proven history and show evidence of strong facilitation of coursework and providing feedback and support. Reviewers observed course instructors providing feedback and support through teacher modeling, gradual release of responsibility, and assessments that allow instructors to differentiate coursework further. In the Course Instructor focus group, instructors discussed recent training in Cognitive Coaching, PLCs, and HQIM and how they have incorporated that learning into their practice.

In one observation, reviewers noted, "The course instructor shows evidence of strong facilitation of coursework by asking students to reflect and then discuss relevant examples of Domain 2 within their individual classrooms. The instructor had all materials organized in the students' learning management system and was clearly prepared to share key resources. The instructor also provided feedback and support to students in response to their reflections about classroom management aligned to the TESS teacher rubric."

INDICATOR 2.2: CLINICAL EXPERIENCES

Criteria 2.2a: Candidates are provided clinical experiences throughout their program that support their development as a teacher

APPROACHING

Metric 1: The sequence of clinical experiences

APPROACHING

The overall sequence of clinical experiences somewhat builds off previous experiences and includes opportunities for learning and development. Teacher candidates attend a 5-day summer orientation prior to their first semester in the program. During orientation, they learn about their coursework and attend speaker sessions about different aspects of the classroom. They also discuss classroom strategies to support them before they begin teaching. In the Clinical Experience focus group, a teacher from the Special Education program shared that they are required to observe other teachers in their building during their first semester. However, this experience was not the same for the other two participants in the focus group.

Metric 2: The variety of clinical experiences

MEETS

The overall variety of clinical experiences provides adequate opportunities for candidates to work with students with varied learning needs. MAT teacher candidates serve as the teacher of record and are organically exposed to a variety of students within their own classrooms. In the Clinical Experience focus group, all participants shared they have a variety of learners in their classrooms, including students on IEPs, 504s, and ELL students. In the Clinical Supervisor focus group, one participant shared that all teacher candidates have students of varied learning needs in their classrooms, and professional development and training are available to candidates to support them with their students. They said their school, co-op and HSU will provide the training they need to support all students.

Criteria 2.2b: Candidates across the program are provided with an effective clinical internship
APPROACHING

Metric 1: The effectiveness of experienced mentor teachers
APPROACHING

HSU provided evidence that some experienced mentor teachers are equipped and demonstrate that they have the coaching skills to properly support and develop a candidate's pedagogical development. In the narrative submitted as evidence, HSU explained that Mentor teachers are assigned by Dawson Educational Cooperative for novice teachers. Since MAT candidates are teachers of record, Henderson State does not identify, place, or track mentor teacher data for the alternative certification program. However, in the Partnership focus group, school leaders shared they identify a mentor teacher for all their new teachers, whether they are undergrads in internship, or MAT students hired as a teacher of record. In the Clinical Experience focus group, participants shared that they have a mentor teacher and indicated that the mentors are in close proximity and work with them every day. No additional evidence was submitted about experienced mentor teachers in alternative route programs.

Note: By 2026-2027, experienced mentor teachers working with year-long residents must have received the DESE-recognized coaching training. [Arkansas Novice Teacher Mentoring Manual](#)

Metric 2: Quality of selection process for experienced mentor teachers
APPROACHING

A partial process is in place to select experienced mentor teachers based on a set of criteria. HSU does not identify or place mentor teacher data for the alternative certification program. In the Partnership focus group, school leaders listed several criteria they use to select their mentor teachers, such as years of classroom experience, demonstrated instructional effectiveness, depth of content, and pedagogical knowledge. However, their selection processes are informal, and not all school leaders follow the required DESE criteria, nor does Henderson track mentor teacher data for MAT teacher candidates.

Metric 3: Quality of clinical supervisors
MEETS

Most program clinical supervisors have a proven history and show evidence of effective instructional practices and coaching with a positive impact. Based on the program handbook, all clinical supervisors must meet a set of criteria to be considered for the role, including training in TESS and experience in the content area they will be coaching. In the Clinical Experience focus group, all participants agreed their clinical supervisors were supportive; one participant shared "This semester, my supervisor and I met for 45 minutes, and she showed me areas of strength and growth." In evaluation from MAT teacher candidates, 90% of respondents said they would recommend their clinical supervisor. In all three coaching observations, reviewers noticed strong instructional practices and feedback.

Metric 4: Quality of feedback to candidates
APPROACHING

Candidates consistently receive feedback of partial quality. Clinical supervisors are required to complete two formal observations per semester which follow the POP (pre- and post-observation) cycle. Clinical supervisors also provide feedback on lesson plans and lesson reflection. Feedback was aligned to the Danielson framework and shared both orally and written, however, in all three coaching observations, reviewers did not observe evidence of feedback linked to student learning or previous feedback. Reviewers also noted that most of the feedback was positive and few suggestions for improvement were given. HSU has adopted the Aspiring Teacher Rubric for the 2024-25 academic year.

Note: The Aspiring Teacher Rubric must be in use by EPPs by the 2024-25 academic year.

Criteria 2.2c: Strong partnerships exist between the EPP and K12 schools and districts that facilitate the development of strong candidates

MEETS

Metric 1: Quality of partnership with districts/schools

MEETS

Collaborative processes are in place with most schools to co-construct the clinical internship. Most MAT teacher candidates are hired in school districts that are part of the Partners in Education (PIE) group. These school partners meet twice per year with HSU to discuss their partnership. In the Partnership focus group, all participants agreed they have a very positive relationship with HSU and gave multiple examples of how they work with HSU to co-construct the internship experience. One example is of a school district that recently implemented a non-traditional calendar. They worked with HSU to ensure teacher candidates would be able to meet the minimum number of required hours for their degree program by utilizing them in different capacities during the "off weeks." Another example was when a partner school was no longer authorized to take Special Education candidates due to state policy changes regarding inclusion. They notified HSU and worked together to identify other partners to step in and support the candidates. All seven participants in the School Partnership focus group agreed that they can communicate with HSU staff on any issue, and that they would be able to work together to solve it very quickly.

Metric 2: Support and development for clinical supervisors

MEETS

Collaborative processes are consistently in place to support and develop effective clinical supervisors. At the beginning of each semester, clinical supervisors (university supervisors) participate in a training that reviews their role and expectations. It focuses on the expectations of the clinical experience and how clinical supervisor should support their interns, how to report internship concerns, and a discussion of each rubric, its different criteria and descriptors. They are also invited to the four "Hot Topic" sessions that include topics such as a career fair, professional development, and presentation and awards. From the focus group, reviewers noted that faculty-based clinical supervisors have a different experience and participate in significantly more training than non-faculty supervisors, including district and co-op professional development and state conferences or training. However, after reviewing all evidence, reviewers found that all clinical supervisors are adequately supported in their role.

INDICATOR 2.3: DEVELOPMENT

Criteria 2.3a: Candidates are successful with their program coursework

APPROACHING

Metric 1: Candidate proficiency in coursework

MEETS

Most candidates show proficiency in coursework requirements. Candidates must maintain a 3.0 GPA to remain in the program. GPAs are checked at admission, admission to candidacy, and upon submission of the graduation application. In the Handbook, it is stated that advisors meet with teacher candidates regularly for course scheduling and during their meeting, a review of their progress is made. HSU reported that this data is not tracked due to financial exigency and reorganization of responsibilities within the Graduate School. Although there was no evidence submitted of a formal tracking system, in the Course Instructor focus group, participants shared that any student not meeting the GPA requirement is required to retake courses when available. Sometimes an extension will be made to allow a teacher candidate additional time, and course supervisors said that 100% of teacher candidates meet coursework requirements and graduate from the program.

Metric 2: Quality of candidate support across coursework

APPROACHING

Candidates are provided support if their coursework requirements are not on track, however, reviewers did not observe evidence of participants taking an active role in creating the plan and monitoring progress. The program utilizes an early alert protocol and there are instances when MAT teacher candidates need to retake a course, or need an extension; however, no evidence was provided of individualized support plans to document the process or the candidate's participation in monitoring their progress.

Criteria 2.3b: Candidates are successful in their clinical internship

MEETS

Metric 1: Candidate attainment of clinical internship goals and milestones

MEETS

Programs have a set of goals and milestones for candidates' clinical internship that are shared during the summer orientation week. It is clear that teacher candidates meet the program requirements. The final assignment data, the Impact on Student Learning Project (ISLP), shows all students receive a score of 3 or above indicating all participants meet program expectations.

Metric 2: Candidate impact on student growth

MEETS

There is adequate evidence that candidates have the capacity to impact student growth. In the Clinical Experience focus group, candidates indicated knowledge of data analysis and measuring student growth through pre and post assessments. One participant shared, "I compared last year and this year to make sure I am getting the information to the students. Last year was a struggle, and I compared that to where I am now, looking at my CFAs. Last year, they only reached 50% passing. This year, they are at 80% passing. I am improving."

All MAT teacher candidates complete the Impact on Student Learning Project (ISLP) at the end of the program. The ISLP requires teacher candidates to submit student pre- and post-assessments and reflect on their own lesson plan and student growth data. Teacher candidates present their project and findings as part of their exit interview to graduate from the program.

Metric 3: Candidate proficiency in effective teaching skills

MEETS

Most candidates receive a score of effective or highly effective on their formal observations. 100% of teacher candidates in the Fall 2023 and Spring 2024 cohorts scored at least a 3.0 (effective) rating in their observations. The overall average observation rating improved from the first observation to the second observation in all domains. During the 2024-25 semesters, HSU has begun using the Aspiring Teacher Rubric.

Note: By 2024-25, evidence that the Aspiring Teacher Rubric is in use by EPPs must be shown to meet this metric.

Metric 4: Quality of candidate support across clinical internship

APPROACHING

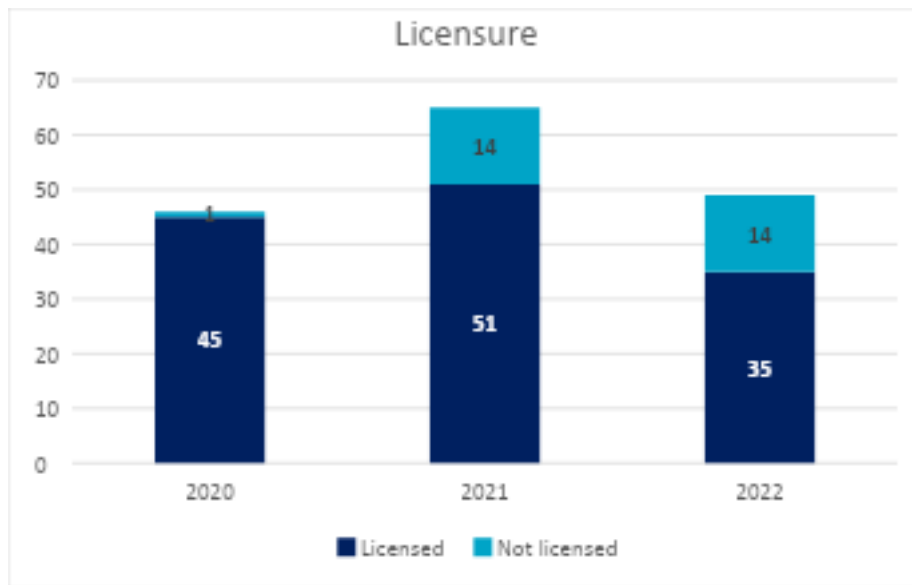

Struggling candidates are sometimes provided with an individualized support plan if their development is not on track. Program supervisors meet with teacher candidates approximately once every two months during the semester. However, no evidence of support plans was provided. Participants in the Clinical Experience focus group agreed they could reach out to the Director if they needed support, but there is no evidence of a formal support process. All participants felt they received the support they needed if they reached out. A participant in the Course Instructor focus group shared that they collaborated with a clinical supervisor to support one candidate struggling with classroom management. In the Clinical Supervisor focus group, participants shared that schools provide support to MAT candidates and pull HSU in as needed. There was no evidence submitted of how high performing candidates receive opportunities and feedback that encourage their retention.

STANDARD 3: SUPPORTING WORKFORCE NEEDS

Standard 3 Performance Level		
MEETS		
Indicator Performance Levels		
Indicator 3.1 Licensure	Indicator 3.2 Employment	Indicator 3.3 Effectiveness
MEETS	EXCEEDS	MEETS
Recommendations		
82% of Henderson State's program completers go on to obtain a standard license after passing their content area exam on their first try. 81.4% of completers who are licensed, gain employment in Arkansas public schools in their first three years after completion. Recommendations include: Analyze EPP Completer Supervisor Survey and EPP Completer Survey results to identify specific domains and components for which both supervisors and candidates do not feel their program prepared them well to become a teacher. (<i>Focus Areas: Criteria 3.3a and 3.3b</i>)		

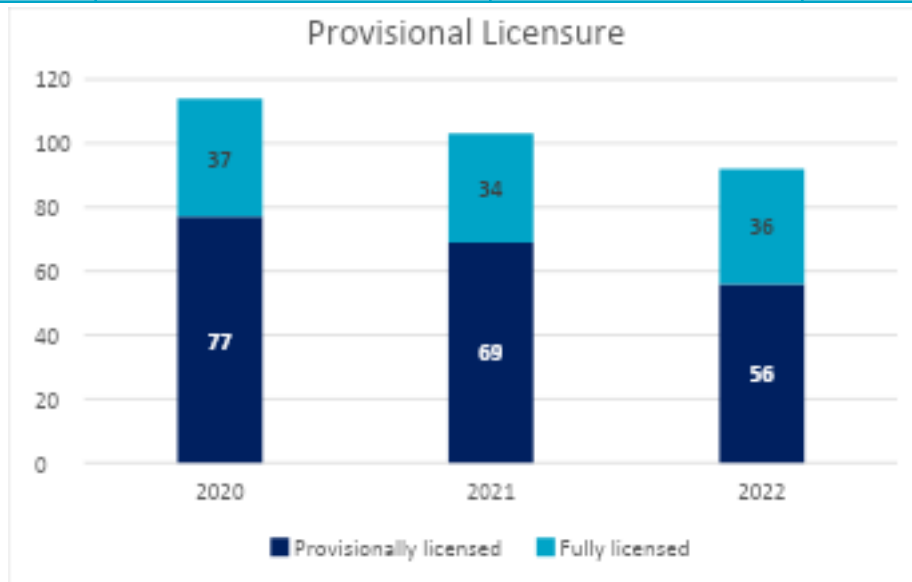

INDICATOR 3.1: LICENSURE

Criteria 3.1a: A high proportion of program candidates obtain a standard license			
Metric	Target	EPP's Percentage Licensed	Performance Level
Percentage of completers who have earned a standard license within one year of completion	76%	82%	EXCEEDS

Criteria 3.1b: A high proportion of alternative route enrollees are provisionally licensed

Metric	Target	EPP's Percentage Licensed	Performance Level
Percentage of employed alternative route enrollees who are provisionally licensed	69%	65.4%	MEETS

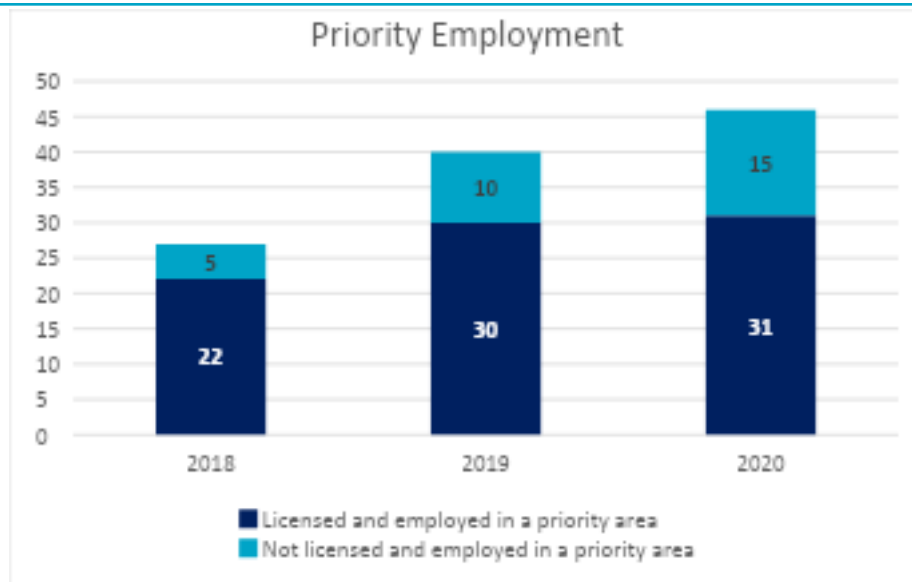

Criteria 3.1c: A high proportion of traditional program candidates pass the content exam in their area on the first try

Metric	Target	EPP's First-Time Pass Percentage	Performance Level
--------	--------	----------------------------------	-------------------

Percentage of first-time licensure exam test takers that pass on their first try	65%	n/a	n/a

INDICATOR 3.2: EMPLOYMENT

Criteria 3.2a: A high proportion of completers are employed in Arkansas public schools															
Metric	Target	EPP's Percentage Employed	Performance Level												
Percentage of completers who are licensed and gain employment in Arkansas public schools in their first three years after completion	64%	81.4%	EXCEEDS												
Employment <table><thead><tr><th>Year</th><th>Licensed and employed</th><th>Not licensed and employed</th></tr></thead><tbody><tr><td>2018</td><td>22</td><td>5</td></tr><tr><td>2019</td><td>33</td><td>7</td></tr><tr><td>2020</td><td>37</td><td>9</td></tr></tbody></table>				Year	Licensed and employed	Not licensed and employed	2018	22	5	2019	33	7	2020	37	9
Year	Licensed and employed	Not licensed and employed													
2018	22	5													
2019	33	7													
2020	37	9													
Criteria 3.2b: A high proportion of completers work in high-priority Arkansas public school districts and subjects															
Metric	Target	EPP's Percentage Employed Priority	Performance Level												
Percentage of completers who are licensed and gain employment in high-priority Arkansas public school districts and subjects in their first three years after completion	40%	73.5%	EXCEEDS												

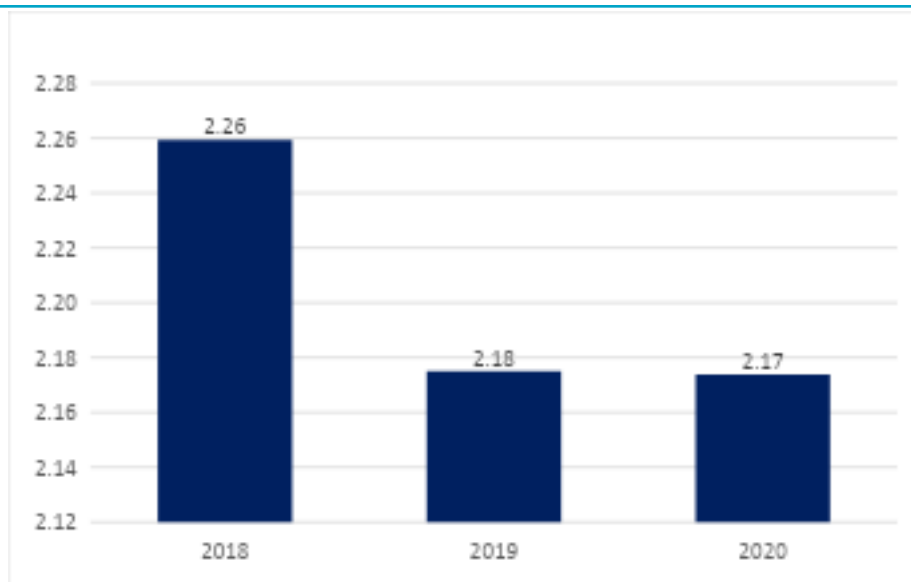

*Priority Employment is employment in a high-need subject area and/or geographical shortage area. Shortage Areas are based on an analysis of 3yrs of data related to teacher supply (EPP pipeline) and demand (unlicensed teachers, attrition, deceased) and state focus areas.

Current subject shortage areas for employment: Computer Science, Secondary Science, Foreign Language, Secondary Math, Middle School Math, Middle School Science, and Special Education.

Current geographical shortage areas are school districts located in the following co-op regions: Arkansas River ESC, Great Rivers ESC, Pulaski Co Schools, Southeast AR ESC.

Criteria 3.2c: Program completers remain in the classroom for multiple years

Metric	Target	EPP's Average Years of Experience, 3 Years After Completion	Performance Level
Program completers' average licensed teaching experience in Arkansas's public schools 3 years after completion	1.7	2.19	EXCEEDS

INDICATOR 3.3: EFFECTIVENESS

Criteria 3.3a: School leaders rate program completers that they hire as effective classroom teachers			
Metric	Target	EPP's Average Percentage of Agree+ on all Survey Items	Performance Level
School leaders' perception of program completer effectiveness based on responses to the EPP Completer Supervisor Survey conducted annually by the DESE	81%	75%	APPROACHING
Criteria 3.3b: Completers feel that their program prepared them well to be a teacher			
Metric	Target	EPP's Average Percentage of Agree+ on all Survey Items	Performance Level
Program completers' perception of how well their program prepared them to be a teacher based on responses to the EPP Completer Survey conducted annually by the DESE	75%	84.6%	EXCEEDS
Criteria 3.3c: A high proportion of program completers have above-average value-added scores			
Metric	Target	EPP's Percentage with Average Value-Added of 80+	Performance Level
Percentage of program completers who have above-average value-added scores in their first three years after completion	43%	41%	MEETS
