

STATE REVIEW LEARNINGS:

WILLIAMS BAPTIST

ALTERNATIVE ROUTE

On-Site Review: April 15-16, 2024

WHAT'S IN THIS REPORT?

The report uses evidence from state data collection and an onsite review to examine educator preparation program performance. The information in this report is meant to inform a continuous improvement process that takes educator preparation programs closer to the goals needed to serve Arkansas's students.

This report rates the EPP on all three Standards of the Arkansas Education Preparation Provider State Review Framework, which are fundamental to support teacher candidates in their journey to becoming successful teachers who meet the needs of students in Arkansas:

- Standard 1, "Candidate Recruitment and Completion," is rated primarily with quantitative data from state data collection.
- For Standard 2, "Preparing Candidates Effectively," criteria to assess performance results from document review, observations, and focus group conversations with stakeholders, including teacher preparation program deans, candidates, current school leaders and teachers, faculty, and the DESE staff.
- The ratings for Standard 3, "Supporting Workforce Needs," are based on state data reporting.

Performance Levels are defined as follows:

Performance Level	Average Score Equivalent
EXCEEDS	Average score equivalent to exceeds on two of three standards or indicators
MEETS	Average score equivalent to meets on all three standards or indicators
APPROACHING	Average score equivalent to approaching on one standard or indicator and meets on the other two
BELOW	Average score equivalent to below on one standard or indicator and approaching on the other two

WILLIAMS BAPTIST UNIVERSITY

ALTERNATIVE ROUTE

Overall Performance Level		
APPROACHING		
Performance Levels by Standard		
Standard 1: Recruitment & Completion	Standard 2: Preparing Candidates Effectively	Standard 3: Supporting Workforce Needs
APPROACHING	APPROACHING	APPROACHING

STANDARD 1: RECRUITMENT & COMPLETION

Standard 1 Performance Level		
APPROACHING		
Indicator Performance Levels		
Indicator 1.1 Plans	Indicator 1.2 Recruitment	Indicator 1.3 Completion
MEETS	APPROACHING	APPROACHING
Recommendations		
Williams Baptist University has a small alternative education preparation program. Recruiting candidates in subject shortage areas will support the program's Standard 1 performance moving forward. Additionally, consider what additional supports those candidates may need to increase the 3-year completion rate. (<i>Focus Areas: Criteria 1.2b, Criteria 1.3a</i>)		

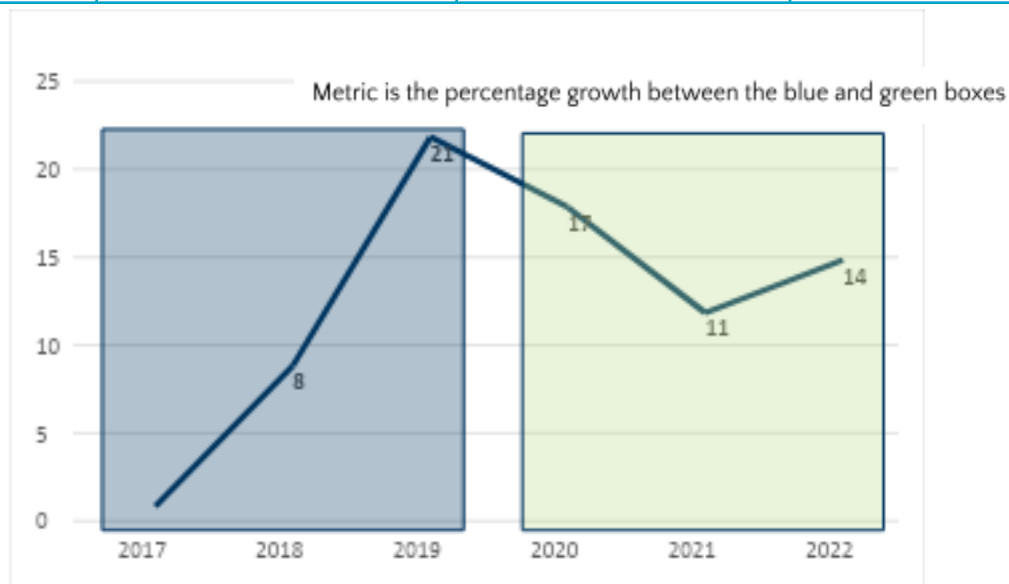

INDICATOR 1.1: PLANS

Criteria 1.1a: Programs have formal plans to meet the targets described in the state review framework (i.e., Standards 1-3) and show evidence of acting on their plans	
Performance Level	Explanation
MEETS	EPPs were not asked to submit formal plans to meet the state review framework targets or to show evidence of acting on their plans as part of the Spring 2024 review cycle. As a result, all EPPs in this cycle will receive a rating of MEETS.

INDICATOR 1.2: RECRUITMENT

Criteria 1.2a: Programs meet annual recruitment targets that align with their program size and Arkansas's workforce needs

Metric	Target	EPP's Percentage Growth in 3yr Average Enrollment	Performance Level
Percentage growth in 3yr average enrollment	10%	44.8%	EXCEEDS

*The enrollment growth target was established to close the sizeable gap between EPP completers and those leaving the classroom over the next 10yrs. EPPs can earn a "Meets" rating by demonstrating positive program enrollment growth (i.e., growth greater than zero) and an "Exceeds" rating by demonstrating growth greater than 10 percent.

Criteria 1.2b: Programs recruit candidates for Arkansas certification shortage areas in proportion to the need

Metric	Target	EPP's Percent of New Enrollees in Shortage Areas	Performance Level
Percentage of program candidates recruited in shortage areas	24%	4%	BELOW

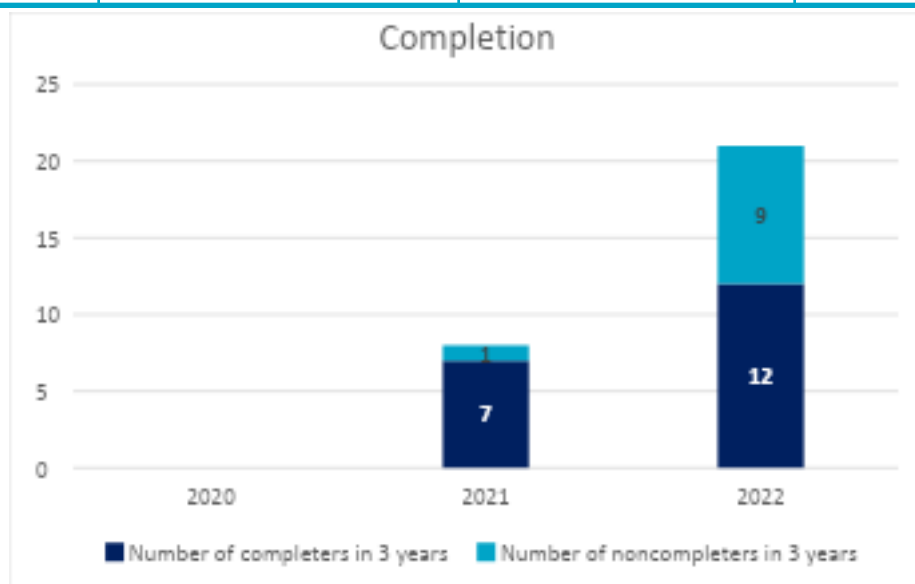

*Shortage Areas are based on an analysis of 3yrs of data related to teacher supply (EPP pipeline), demand (unlicensed teachers, attrition, deceased), and state focus areas. Current licensure areas of shortage: Computer Science (4-12), Biology (7-12), Chemistry (7-12), Physics (7-12), Foreign Language (K-12), Math (7-12), Math (4-8), Science (4-8), Special Education (K-12)

INDICATOR 1.3: COMPLETION

Criteria 1.3a: Candidates have high rates of completion

Metric	Target	EPP's 3-Year Completion Rate	Performance Level
Three-year average completion rate	75%	66%	APPROACHING

Standard 2: PREPARING CANDIDATES EFFECTIVELY

Standard 2 Performance Level		
APPROACHING		
Indicator Performance Levels		
Indicator 2.1 Coursework	Indicator 2.2 Clinical Experiences	Indicator 2.3 Development
APPROACHING	APPROACHING	APPROACHING
Recommendations		
Teacher candidates in the alternative route program at Williams Teacher Education Program (WTEP) consistently earn high grades and TESS evaluation ratings and have a track record of positively impacting student outcomes. The program's course instructors and clinical supervisors provide individualized support, and there are many opportunities for students to receive feedback throughout the program. School partners agreed their partnership with WTEP is mutually beneficial, and they actively seek out teachers from Williams Baptist because they know they produce strong teachers. Recommendations to strengthen candidate preparation includes: • Document a clear and intentional process to fully support teacher candidates who may fall behind in their coursework or clinical experience that allows WTEP staff and the teacher candidate to actively monitor their progress to getting back on track (<i>Focus Areas: Criteria 2.3a Metric 2, 2.3b Metric 4</i>) • Document opportunities for students to fully reflect on their coursework and alignment to their clinical internship experiences, especially with their clinical supervisor and mentor teachers. Ensure that all teacher candidates have opportunities to vertically integrate standards throughout their licensure area in their coursework. (<i>Focus Areas: Criteria 2.1a Metric 2, 2.1b Metric 3</i>) • Begin preparing now to meet the state's one-year residency requirement that will apply to spring 2027 completers and beyond. Formalize systems and structures to ensure that the mentor teachers and clinical supervisors working with candidates in the building are experienced, very effective and, by the 2026-2027 school year, have received DESE-recognized coaching training. (<i>Focus Area: Criteria 2.2b</i>)		

INDICATOR 2.1: COURSEWORK

Criteria 2.1a: Candidates receive high-quality program coursework that is evidence-based APPROACHING
Metric 1: Incorporation and demonstration of best practices around content instruction APPROACHING
Coursework somewhat incorporates nationally recognized best practices around content instruction. In the syllabi, reviewers saw evidence of best practices such as utilizing rubrics for grading, candidate self-assessments on teaching practices, professional dispositions calibrated with feedback from the course instructor, application of teaching strategy questions in pre-clinical course assignments, i.e., "Indicate how you could use [stations, centers, agendas] this

in the classroom," and peer collaboration on an online discussion board. Limited evidence of HQIM recognition by teaching candidates was observed by reviewers. One of the two Coursework focus group candidates was familiar with "My Perspectives," an HQIM used in the partnership schools. The second participant was not able to respond with any understanding of HQIM. One participant in the Program Director focus group shared that teaching candidates are given assignments to explore EdReports. Reviewers did not see evidence of incorporating HQIM into lesson planning. The program director also mentioned that they would provide training this summer, but the details were vague. The evidence suggests that exposing the candidates to HQIM was more of a basic introduction rather than intentionally incorporating it.

Metric 2: Incorporation and utilization of Arkansas K-12 Standards in coursework as a foundation for teacher development

APPROACHING

Coursework somewhat familiarizes candidates with Arkansas K-12 Standards throughout the grade bands within the licensure area. In coursework, candidates develop lesson plans for assignments based on AR K-12 Standards. For example, the Capstone project in Internship Term 1 requires a unit plan of five lessons aligned to AR K-12 Standards. In the Coursework focus group with MAT Interns, both teacher candidates spoke about using AR K-12 Standards while developing learning targets, lesson plans, assessments, and implementing activities.

Reviewers did not observe opportunities for teaching candidates to vertically integrate standards throughout all grade bands within a teacher's licensure areas. One of the Coursework focus group participants mentioned that they learned about vertical alignment through their school's PLC, not the WTEP.

Science of Reading (SOR) course AR IDEAS 18 Hr Awareness Pathway aligns with DESE-approved requirements.

Criteria 2.1b: Candidates' coursework supports their development as a teacher

APPROACHING

Metric 1: Sequence and progression of courses

APPROACHING

Courses somewhat build off previous coursework. The "TEP MAT Program Progression Points" document shows progression points throughout the MAT program. The Spring Track 2 (MAT5113) course observed by reviewers built upon the Spring Track 1 (MAT5113) course and incorporated learnings from Track 1 into Track 2, for example, in Spring Track 1, teacher candidates begin collecting evidence for their disposition which is completed in the Spring Track 2 course, and there are two checkpoints for their disposition - one in each course. However, candidates start with different courses depending on the semester they begin the program, so there is limited evidence of clear and intentional sequencing within the coursework.

Metric 2: Incorporation and utilization of Arkansas Educator Competencies and Arkansas Teaching Standards in coursework

MEETS

Coursework clearly and intentionally incorporates Arkansas Teaching Standards in a way that develops candidates to meet the knowledge and skills of their required licensure area. The dispositions portfolio process allows candidates to submit and reflect upon evidence aligned to the TESS Rubric and Arkansas Teacher Standards. The matrix provided for alternative route coursework shows alignment with these standards. Reviewers noted that the Arkansas Teaching Standards are introduced in the Spring Track 1 (MAT5113) course, and TESS evaluations are incorporated throughout the courses.

Metric 3: Alignment of coursework to clinical experience

APPROACHING

Coursework is somewhat aligned to the clinical experience in the alternative route program. Assignments require teacher candidates to develop lesson plans based on standards to analyze student data and incorporate strategies they learn about in class. The "Course Alignment with Teacher Excellence and Support System" documents some of this. The MAT 5113 courses are directly linked to the teacher candidate's classroom experience, where teacher candidates use a discussion board to discuss what they are learning and how they are incorporating it into the classroom. However, although the "MAT Growth Mindset Survey" and "Video reflection" were shared, these activities captured an individual's reflection of clinical experience. In the Coursework focus group, participants shared that the reflections were an opportunity for peer sharing and networking. No specific evidence was gathered for candidates having some opportunities to reflect on and articulate the alignment with their clinical supervisor and course instructors.

Criteria 2.1c: Candidates are provided with knowledgeable and effective course instructors

MEETS

Metric 1: Quality of course instructors

MEETS

Most course instructors show deep knowledge of Arkansas K-12 standards, content knowledge, and pedagogy. All three instructors have advanced degrees and teaching licenses. They all have over twelve years of teaching experience in K-12 schools. All instructors have received TESS training and plan to complete Cognitive Coaching training this summer. Additional conferences and training attended include the DESE Redesigning Mentoring, NSTA Conference, Solution Tree PLC, and the Arkansas Leadership Academy: Master Principal Program. The Program Director focus group mentioned that during the interview process, instructor candidates model lessons in front of the faculty. They must demonstrate criteria for specific positions and model the dispositions. Experience in coaching and mentoring, giving feedback, and understanding coaching forms and process guidelines is expected. Finally, the job description states that they must have classroom experience and a teaching certificate.

Metric 2: Effectiveness of course instructors

MEETS

Most course instructors show evidence of strong coursework facilitation and of providing feedback and support. Though the MAT courses are virtual, reviewers observed that the course instructor regularly comments and is engaged in the Eagle Board message board (a virtual discussion board for each course). In the Coursework focus group, both participants shared that they received "insightful, timely, and good feedback" from their course instructors.

Course instructors are indirectly assessed and evaluated through candidate evaluations post-program. The WTTP provided the "WBU MAT End of Program Survey" as evidence; three teaching candidates completed the survey and rated the program as "highly effective" in preparing them for their internship.; course instructor focus group- support through WBU's eagle message board that fosters virtual engagement and collaboration among candidates through discussion of various facets of their school experience (e.g., the science of reading, professional learning communities, student engagement, etc.). Feedback is aligned to the TESS rubric, and instructors agreed that debrief conversations are important for helping the candidate to appropriately calibrate their rating on the rubric. In the Coursework focus group general answers were provided. Much of the response to the "instructors providing feedback and support" question focused on course advising, advice, and interviewing. When asked, focus group candidates confirmed that they were able (and encouraged) to reach out to their course instructor anytime they needed support. In the Coursework observation Internship Track 1(MAT 5113), the Course instructor shows some evidence of strong facilitation of coursework through asynchronous discussion boards and of providing consistent feedback to candidates on four TESS evaluations and two WBU dispositions assessments throughout the clinical experience. There is one primary instructor for all MAT courses, and there is additional support from adjunct faculty who are principals in local schools.

INDICATOR 2.2: CLINICAL EXPERIENCES

Criteria 2.2a: Candidates are provided clinical experiences throughout their program that support their development as a teacher

APPROACHING

Metric 1: The sequence of clinical experiences

APPROACHING

The overall sequence of clinical experiences somewhat builds on previous experiences. Most alternative route teacher candidates are hired as teachers of record, and many of them have previous classroom experience. As a result, there is not a gradual release into a clinical experience unless a teacher in the program is not already hired as a teacher of record.

Metric 2: The variety of clinical experiences

APPROACHING

The overall variety of clinical experiences provides some opportunities for candidates to work with students with varied learning needs. Since most alternative route teachers are hired as teachers of record, they are limited in their experiences and the setting of their current classroom. However, WTEP works with a variety of partner schools, and all participants in the Intern focus group shared that they have a variety of learners in their classrooms, including students on IEPs, 504s, and ELL students.

Criteria 2.2b: Candidates across the program are provided with an effective clinical internship
MEETS

Metric 1: The effectiveness of experienced mentor teachers
APPROACHING

Some experienced mentor teachers are equipped and demonstrate that they have the coaching skills to properly support and develop a candidate's pedagogical development. The "Experienced Mentor Teacher tracker" shows all mentor teachers have multiple years of experience; nearly all have a master's degree and are trained in TESS. Seventy-five percent of clinical interns stated their experienced mentor teachers were highly effective, and 25% rated them as effective. However, reviewers noted that not all teacher candidates have the same experiences with mentor teachers. In the Clinical Experience focus group, participants said that although there are some observations and meetings and they are available for consultation, there is no consistent schedule of observations with feedback. In the Clinical Experience Intern focus group, two participants shared examples of how they work with their mentor teachers who are highly engaged, while one participant said she is never observed because she and her mentor teacher have the same prep hour, so the support she received was less effective than her peers

Note: By 2026–2027, evidence that experienced mentor teachers working with year-long residents have received DESE-recognized coaching training must be shown to meet this metric.

Metric 2: Quality of selection process for experienced mentor teachers
MEETS

A clear and intentional process is in place to select experienced mentor teachers based on criteria. As outlined in their MOU, the WTEP expects all partner schools to assign a mentor teacher to students in the alternative route program. The criteria for the experienced mentor teacher follow those stated in the DESE handbook: valid teaching license, at least three years of teaching experience, effective or highly effective rating, and proven mentoring skills. In the Partnership focus group, K-12 leaders said that mentor teachers assigned to all first-year teachers have received peer teacher training through the state and are experienced in mentoring novice teachers. The principal relies on teacher evaluations across the TESS domains and teacher dispositions based on the principal's experience with them to determine who is a good fit as a mentor teacher.

Note: By 2026–2027, evidence that experienced mentor teachers working with year-long residents have a minimum 3 years teaching experience, hold a standard Arkansas educators license with a Lead or Master Professional Educator designation, and have evidence of an annual rating of effective or higher in DESE's Educator Effectiveness System must be shown to meet this metric.

Metric 3: Quality of clinical supervisors
MEETS

There is only one clinical supervisor for MAT teaching candidates. Provided evidence indicated that she employs effective instructional practices and coaching. Focus group participants agreed their clinical supervisor provides support and coaching that supports them in their clinical internships or classroom positions. The WTEP is currently redesigning its annual performance review and development process. It will include a self-reflection and a section for the supervisor to rate their performance. The annual review aims to celebrate accomplishments, identify areas of improvement, establish goals, and develop professionally. Spring 2024 will be the first round of feedback.

Metric 4: Quality of feedback to candidates
APPROACHING

Candidates sometimes receive high-quality feedback from their clinical supervisor. All clinical interns agreed they receive support from their clinical supervisor, who is available and responsive. In the Spring Internship courses, students must submit four video lessons. They receive detailed feedback directly related to TESS and build upon their previous video submission. Reviewers noted that in only two out of the three Coaching session observations, the clinical supervisor displayed the TESS Rubric on-screen and led a discussion of past and current practice and highlighted areas of strength and areas for growth. Some feedback was specific to the candidate's individual

experience and needs; however, most of the feedback was positive encouragement rather than constructive feedback to help them develop. It was stated that formative feedback is given throughout the clinical supervision process, typically during weekly site supervision sessions, but reviewers did not observe specific evidence of this.

Note: By 2024–25, evidence that the Aspiring Teacher Rubric is in use by EPPs must be shown to meet this metric.

Criteria 2.2c: Strong partnerships exist between the EPP and K12 schools and districts that facilitate the development of strong candidates

MEETS

Metric 1: Quality of partnership with districts/schools

MEETS

Collaborative processes are in place with most districts to co-construct the clinical internship for candidates. The WTEP has long-standing relationships with their partner schools, and even though most alternative route candidates are hired as teachers of record, they are usually hired at a current partner school. In the Partner School focus group, principals shared the MOU outlines requirements, such as assigning mentor teachers, and one principal shared that WBU is their strongest partner (compared to other EPPs they work with) because the WBU staff are so supportive and is a mutually beneficial partnership. They shared, "WTEP has worked and communicated with us far beyond any other college in this area. They want to help us with our needs, and we want to help them to develop their students." The WTEP also shared the "Clinical Supervisor Handbook" as evidence of collaboration. One purpose of the handbook is to ensure ongoing communication and to help build relationships with the EPP and school partners.

Metric 2: Support and development for clinical supervisors

MEETS

Collaborative processes are consistently in place to support and develop effective clinical supervisors. The Clinical Supervisor Handbook provides an overview of the roles and responsibilities and an outline of the responsibilities and philosophy behind evaluations. The clinical supervisor works closely with course instructors and the Education Chair to continue to develop the alternative route program. In the Program Director focus group, one participant said, "Coaching is collaborative," and that they are involved in the process with their clinical supervisor, asking them what is going well and what should be changed. The WTEP will also participate in the Cognitive Coaching training to continue supporting teacher candidates, and there are plans for everyone to participate in the training including teacher candidates, supervisors, and cooperating teachers. Faculty from the WTEP alternate route program joined and received support this past year from the Forward Arkansas Design Collaborative session to develop an understanding of Arkansas LEARNS, quality objectives, the year-long residency, and other EPP-chosen topics.

INDICATOR 2.3: DEVELOPMENT

Criteria 2.3a: Candidates are successful with their program coursework

APPROACHING

Metric 1: Candidate proficiency in coursework

MEETS

Most candidates show proficiency in coursework requirements. Nearly all MAT completers graduated with a higher GPA than their admission GPA, with a cohort mean of 3.92 in Spring 2023 and 3.96 in Fall 2023. The program requires all students to maintain a 3.0 GPA, and in the last 12 years, only two students fell below this requirement. In the "Course Tracking Spreadsheet," evidence showed that the staff tracks proficiency from admission to internship to licensure. The "Student Degree Plan" document monitors proficiency to evaluate progress toward meeting Arkansas licensure requirements.

Metric 2: Quality of candidate support across coursework

APPROACHING

Candidates are provided with individualized support if they are off-track with their coursework. However, the alternative route program does not have a formal support plan in place to track a teacher candidate's progress toward

improvement. Informally, the course instructor works with the teacher candidate, clinical supervisor, and principal to determine what steps are needed and how to support them.

Criteria 2.3b: Candidates are successful in their clinical internship

MEETS

Metric 1: Candidate attainment of clinical internship goals and milestones

MEETS

Programs have clear and appropriate goals and milestones for candidates' clinical internships, and most candidates meet their clinical experience goals and milestones. The program has clear progression and check-in points regarding a teacher candidate's progress. Most candidates meet these milestones as evidenced by candidate GPA and TESS domain scores. The "MAT Program Clinical Experiences Tracking" and "MAT Licensure Approval in AELS and Praxis Tracking" spreadsheets help faculty monitor progress from admissions to internship. In the Clinical Experience focus group, participants were very aware of their projected milestones. Their responses were detailed and specific to the goals.

Metric 2: Candidate impact on student growth

MEETS

There is adequate evidence that candidates impact student growth. Throughout assignments, particularly in the Spring Internship course, students complete a Capstone Project to create lesson plans and assessments, analyze student data, and reflect on student learning and growth. Teacher candidates in the Clinical Experience focus group shared how they use student data such as exit tickets, grades, and more formal assessments such as ACT Aspire, and practice ATLAS to evaluate growth in their classrooms. They were able to expound upon specific examples of where they have seen growth, particularly with their ELL students and students on an IEP.

Metric 3: Candidate proficiency in effective teaching skills

MEETS

All candidates from the last three semesters received at least an "Effective" rating on the TESS rubric. Coaching evidence included the rationale for ratings and highlighted the skills demonstrated by teacher candidates. One review team noted that some MAT participants earned the "Highly Effective" rating across all domains, and the reviewers found this surprising for a first-year teacher, noting that it may be helpful to re-norm on the rubric to ensure teaching candidates are accurately rated.

Note: By 2024–25, evidence that the Aspiring Teacher Rubric is in use by EPPs must be shown to meet this metric.

Metric 4: Quality of candidate support across clinical internship

APPROACHING

Candidates are provided with individualized support if their development is not on track; however, a formal support plan process does not exist in the alternative route program. The clinical supervisor shared that they are working towards this. Teacher candidates receive individualized support when they need it, and the clinical supervisor works with course instructors, the candidate, and the principal to form a plan of support.

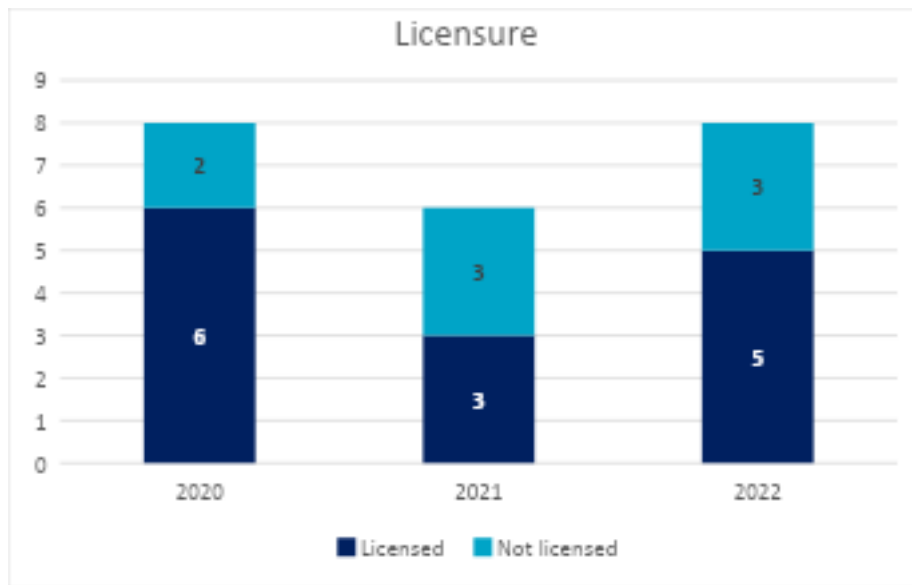

High-performing teacher candidates receive opportunities and feedback that encourage their retention. Interns in the focus group shared that they regularly receive positive feedback, and one teacher candidate was recommended for a leadership position in their PLC by her mentor teacher. Alternative route interns can support teachers in the traditional program through the Newport School District partnership when traditional teacher candidates come in for the read-aloud, and the alternative route participants observe and provide feedback, another example of demonstrating leadership opportunities.

STANDARD 3: SUPPORTING WORKFORCE NEEDS

Standard 3 Performance Level		
APPROACHING		
Indicator Performance Levels		
Indicator 3.1 Licensure	Indicator 3.2 Employment	Indicator 3.3 Effectiveness
BELOW	EXCEEDS	APPROACHING
Recommendations		
Recommendations include: - Establish programmatic support to ensure that alternative program enrollees who are employed obtain provisional licensure and are prepared to obtain standard licensure immediately following completion. <i>(Focus Areas: Criteria 3.1a and 3.1b)</i> - Analyze EPP Completer Supervisor Survey results to identify specific domains and components for which both supervisors and candidates do not feel their program prepared them well to become a teacher. <i>(Focus Areas: Criteria 3.3a)</i>		

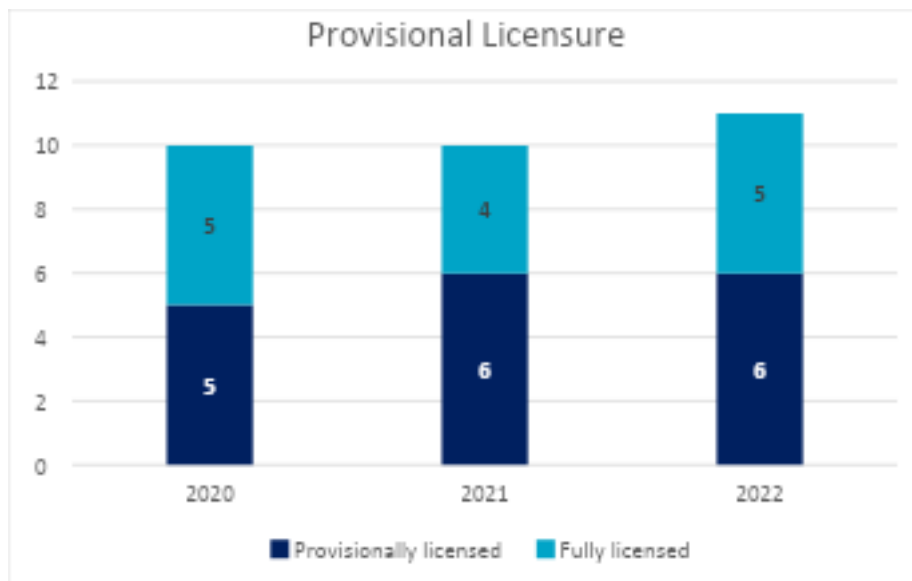

INDICATOR 3.1: LICENSURE

Criteria 3.1a: A high proportion of program candidates obtain a standard license			
Metric	Target	EPP's Percentage Licensed	Performance Level
Percentage of completers who have earned a standard license	76%	64%	BELOW

Criteria 3.1b: A high proportion of alternative route enrollees are provisionally licensed

Metric	Target	EPP's Percentage Licensed	Performance Level
Percentage of employed alternative route enrollees who are provisionally licensed	69%	54.8%	BELOW

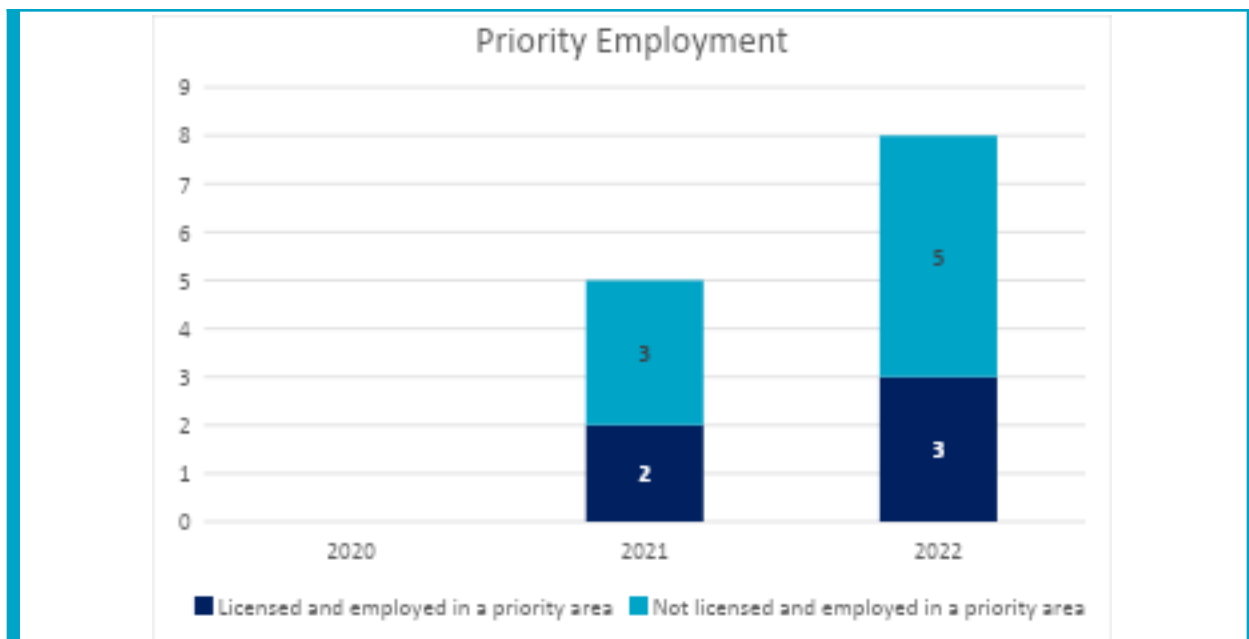

Criteria 3.1c: A high proportion of traditional program candidates pass the content exam in their area on the first try

Metric	Target	EPP's First-Time Pass Percentage	Performance Level
Percentage of first-time licensure exam test takers that pass on their first try	n/a	n/a	n/a

INDICATOR 3.2: EMPLOYMENT

Criteria 3.2a: A high proportion of completers are employed in Arkansas public schools															
Metric	Target	EPP's Percentage Employed	Performance Level												
Percentage of completers who are licensed and gain employment in Arkansas public schools in their first three years after completion	64%	76.9%	EXCEEDS												
Employment <table><thead><tr><th>Year</th><th>Licensed and employed</th><th>Not licensed and employed</th></tr></thead><tbody><tr><td>2020</td><td>0</td><td>0</td></tr><tr><td>2021</td><td>4</td><td>1</td></tr><tr><td>2022</td><td>6</td><td>2</td></tr></tbody></table>				Year	Licensed and employed	Not licensed and employed	2020	0	0	2021	4	1	2022	6	2
Year	Licensed and employed	Not licensed and employed													
2020	0	0													
2021	4	1													
2022	6	2													
Criteria 3.2b: A high proportion of completers work in high-priority Arkansas public school districts and subjects															
Metric	Target	EPP's Percentage Employed Priority	Performance Level												
Percentage of completers who are licensed and gain employment in high-priority Arkansas public school districts and subjects in their first three years after completion	40%	38.5%	MEETS												

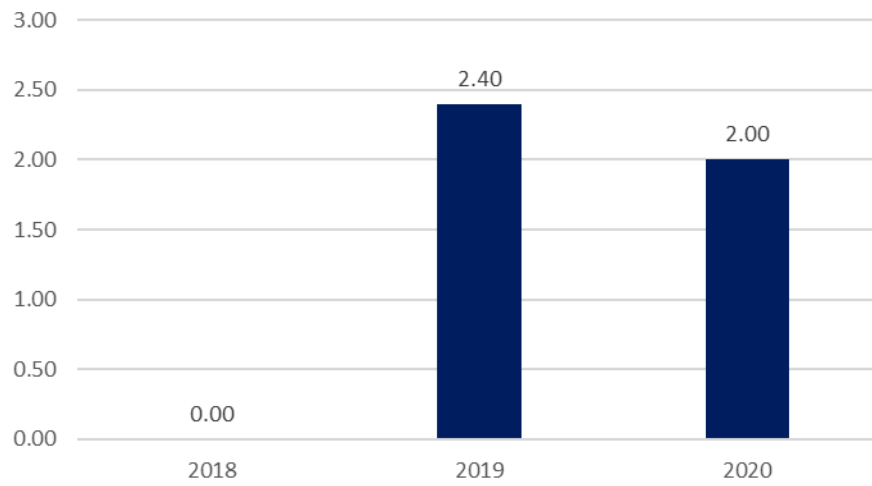

*Priority Employment is employment in a high-need subject area and/or geographical shortage area. Shortage Areas are based on an analysis of 3yrs of data related to teacher supply (EPP pipeline) and demand (unlicensed teachers, attrition, deceased) and state focus areas.

Current subject shortage areas for employment: Computer Science, Secondary Science, Foreign Language, Secondary Math, Middle School Math, Middle School Science, and Special Education.

Current geographical shortage areas are school districts located in the following co-op regions: Arkansas River ESC, Great Rivers ESC, Pulaski Co Schools, Southeast AR ESC.

Criteria 3.2c: Program completers remain in the classroom for multiple years			
Metric	Target	EPP's Average Years of Experience, 3 Years After Completion	Performance Level
Program completers' average licensed teaching experience in Arkansas's public schools 3 years after completion	1.7	2.15	EXCEEDS

Average experience 3 years after completion

INDICATOR 3.3: EFFECTIVENESS

Criteria 3.3a: School leaders rate program completers that they hire as effective classroom teachers			
Metric	Target	EPP's Average Percentage of Agree+ on all Survey Items	Performance Level
School leaders' perception of program completer effectiveness based on responses to the EPP Completer Supervisor Survey conducted annually by DESE	81%	50%	BELOW
Criteria 3.3b: Completers feel that their program prepared them well to be a teacher			
Metric	Target	EPP's Average Percentage of Agree+ on all Survey Items	Performance Level
Program completers' perception of how well their program prepared them to be a teacher based on responses to the EPP Completer Survey conducted annually by DESE	75%	100%	EXCEEDS
Criteria 3.3c: A high proportion of program completers have above-average value-added scores			
Metric	Target	EPP's Percentage with Average Value-Added of 80+	Performance Level
Percentage of program completers who have above-average value-added scores in their first three years after completion	43%	38%	APPROACHING
